Perch Dissection Answers |  
happyhounds.pridesource  
Answers to Dissection  
Questions: The general body  
shape of a perch is very  
tapered. The width of the  
perch is quite small, but it is  
long and tall. The front  
tapers off to the mouth, and  
the back tapers to the rear  
fin. This adaptive body  
shape allows for smooth and  
fast navigation through  
water. The fins allow  
turning, propulsion, and  
control as well.

Alvin\_Martin. Zoology perch dissection. Terms in this set (16)

Perch belong to what class of bony fish? Ray finned fish. Are

perch ray finned or lobe finned?

Ray finned, because they have spiny rays of cartilage to support their fins. What are the fins on a perch? Pectoral, pelvic, dorsal, anal, and caudal.

support called the gill arch and the soft gill filaments that make up each gill. Label the parts.

Perch Dissection Lab - Noah Gersh's STEM Website

The scientific name for the yellow perch, most often used in dissection, is *Perca flavescens* (*Perca* means “dusky”; *flavescens* means “becoming gold colored”). The sides of the yellow perch are golden yellow to brassy green with six to eight dark vertical saddles and a white to yellow belly.

Perch Dissection Flashcards | Quizlet

Occasionally we substitute yellow perch, *Perca flavescens*, based on supply availability. Before beginning your dissection, observe the external anatomy of the perch, including the lateral line along the side of the fish, the perch's mouth, eyes,

external nares, teeth, gill covering (also known as the operculum), spiny dorsal fin, soft dorsal fin, caudal fin (tail), anal fin, pectoral fin, pelvic fin, and more.

*Skills Practice Lab Perch Dissection*

1. Once your group has finished observing and identifying the structures of the perch, it must be disposed of safely. If there are any excess fluids in your dissecting tray, please pour them down the sink with plenty of water. 2. Place all fish and fish tissues directly into the garbage bag provided by your teacher. 3.

identification of internal ...

Perch Dissection 2 -  
BIOLOGY JUNCTION

perch are only slightly  
posterior and ventral to the  
pectorals. The entire, less  
pigmented ventral area is  
usually called the belly (not  
very scientific, but descriptive  
none-the-less). The dorsal fin  
is composed of two distinct  
sections; the anterior most  
section has spiny rays and  
posterior section has soft rays.
