An Introduction to Ontology Penguin
The United States' failure to educate its students leaves them unprepared to compete and threatens the country's ability to thrive in a global economy and maintain its leadership role. This report notes that while the United States invests more in K-12 public education than many other developed countries, its students are ill prepared to compete with their global peers. According to the results of the 2009 Program for

International Student Assessment (PISA), an international assessment that measures the performance of 15-year-olds in reading, mathematics, and science every three years, U.S. students rank fourteenth in reading, twenty-fifth in math, and seventeenth in science compared to students in other industrialized countries. The lack of preparedness poses threats on five national security fronts: economic growth and competitiveness, physical safety, intellectual property, U.S. global awareness, and U.S. unity and cohesion, says the report. Too many young people are not employable in an increasingly high-skilled and global economy, and too many are not qualified to join the military because they are physically unfit, have criminal records, or have an inadequate level of education. The report proposes three overarching policy recommendations: implement educational expectations and assessments in subjects vital to protecting national security; make structural changes to provide students with good choices; and, launch a "national security readiness audit" to hold schools and policymakers accountable for results and to raise public awareness.

In this engaging and wide-ranging new book, Nikk Effingham provides an introduction to contemporary ontology - the study of what exists - and its importance for philosophy today. He covers the key topics in the field, from the ontology of holes, numbers and possible worlds, to space, time and the ontology of material objects - for instance, whether there are composite objects such as tables, chairs or even you and me. While starting from the basics, every chapter is up-to-date with the most recent developments in the field, introducing both longstanding theories and cutting-edge advances. As well as discussing the latest issues in ontology, Effingham also helpfully deals in-depth with different methodological principles (including theory choice, Quinean ontological commitment and Meinongianism) and introduces them alongside an

example ontological theory that puts them into practice. This accessible and comprehensive introduction will be essential reading for upper-level undergraduate and post-graduate students, as well as any reader interested in the present state of the subject.

Tiger Striped National Geographic Books
#1 NEW YORK TIMES BESTSELLER • The incredible true story of survival and salvation that is the basis for two major motion pictures: 2014's *Unbroken* and the upcoming *Unbroken: Path to Redemption*. On a May afternoon in 1943, an Army Air Forces bomber crashed into the Pacific Ocean and disappeared, leaving only a spray of debris and a slick of

oil, gasoline, and blood. Then, on the ocean surface, a face appeared. It was that of a young lieutenant, the plane's bombardier, who was struggling to a life raft and pulling himself aboard. So began one of the most extraordinary odysseys of the Second World War. The lieutenant's name was Louis Zamperini. In boyhood, he'd been a cunning and incorrigible delinquent, breaking into houses, brawling, and fleeing his home to ride the rails. As a teenager, he had channeled his defiance into running, discovering a prodigious talent that had carried him to the Berlin Olympics and within sight of the four-minute mile. But when war had come, the athlete had become an airman, embarking on a journey that led to his doomed flight, a tiny raft, and a drift into the unknown. Ahead of Zamperini lay thousands of miles of open ocean, leaping sharks, a foundering raft, thirst and starvation, enemy aircraft, and, beyond, a trial even greater. Driven to the limits of endurance, Zamperini would answer desperation with ingenuity; suffering with hope, resolve, and humor; brutality with rebellion. His fate, whether triumph or tragedy, would be suspended on the fraying wire of his will. In her long-awaited new book, Laura Hillenbrand writes with the same rich and vivid narrative

When Broderick is captured, mistaken for a Guardian, it's Joanne who figures out that hackers are after the Guardian Network, the database that holds the deep secrets of Shifters past and present. Strangely Broderick now holds the key to stopping the hackers from releasing deadly danger on the Shifters, and Joanne with her coding skills is the only one who can help him. Bound to You Midnight Romance, LLC

In *Return Engagements* artist and critic Vi?t Lê examines contemporary art in Cambodia and Vi?t Nam to rethink the entwinement of militarization, trauma, diaspora, and modernity in Southeast Asian art. Highlighting artists tied to Phnom Penh and Sài Gòn and drawing on a range of visual art as well as

documentary and experimental films, Lê points out that artists of Southeast Asian descent are often expected to address the twin traumas of armed conflict and modernization, and shows how desirable art on these themes is on international art markets. As the global art market fetishizes trauma and violence, artists strategically align their work with those tropes in ways that Lê suggests allow them to reinvent such aesthetics and discursive spaces. By returning to and refashioning these themes, artists such as Tiffany Chung, Rithy Panh, and Sopheap Pich challenge categorizations of “diasporic” and “local” by situating themselves as insiders and outsiders relative to Cambodia and Vi?t Nam. By doing so, they disrupt dominant understandings of place, time, and belonging in contemporary art.
