major study comparing the Cambridge First Certificate in English (FCE) with the Test of English as a Foreign Language (TOEFL) to investigate similarities in test content, candidature and use. While both tests were designed to measure many of the same abilities, they represent radically different approaches to language test development, reflecting deeper differences between

educational measurement traditions in the US and UK. The thorough investigation of the fundamental characteristics and operational utility of two of the most widely used English tests for foreign students makes this study a valuable contribution to language testing research. As such, it will be of considerable interest to language testing specialists and examination boards, as well as to academic researchers and

graduate students in the field of language assessment more generally. *Examining Writing* McGraw Hill Professional Complete First Certificate is a new course for the 2008 revised FCE exam. - Develop *Smart*

Habits • Acquire High-Quality Knowledge • Use High-Quality Knowledge when needed *Smart Thinking* explores each part of the *Smart Thinking* formula and provides:

- An understanding of how the mind works and the means to replace self-limiting habits with those that foster *Smart Thinking* • Insights into how memory functions and how to improve the quality of what you learn • Ways to present new information

effectively • Specific techniques for improving your understanding of how the world works • The ability to define and solve problems by finding the relevant knowledge from any area of expertise and applying it effectively Drawing on multiple research disciplines, including psychology, artificial intelligence, philosophy, neuroscience, learning sciences,

linguistics, anthropology, sociology, and education, Markman provides insights into the functioning of the mind and synthesizes this understanding into practical tools and exercises that develop new skills and achieve personal goals.
