<u>5 Study Guide - Nervous system - KEY</u> The peripheral nervous system (PNS) has two

components: the somatic nervous system and the autonomic nervous system. The PNS consists of all of the nerves that lie outside the brain and spinal cord. Nerves are bundles of neuron fibers (axons) that are grouped together to carry information to and from the same structure.

Nervous System Overview: Central & Peripheral - Study.com

There are two major branches of the nervous system: the central nervous system, CNS, and the peripheral nervous system, PNS. The CNS consists of the brain and spinal cord, and the PNS is all of ...

Peripheral\_Nervous\_System\_Study\_Guide. docx - Peripheral ...

A) Central nervous system B) Peripheral nervous system C) Both A and B D) None of the above For the brain, spinal cord,

and/or peripheral nerves, identify whether they belong to the central ...

How the Peripheral Nervous System Works
First, it is important to realize that the nervous system is divided into two parts: the central nervous system and the peripheral nervous system. The central nervous system includes the brain and spinal cord, while the peripheral nervous system includes all of the nerves that branch out from the brain and spinal cord and extend to other parts of the body including muscles and organs.

#### A&P lecture study guide, unit 3

The peripheral nervous system consists of the somatic nervous system (SNS) and the autonomic nervous system (ANS). The SNS consists of motor neurons that stimulate skeletal muscles. In contrast, the ANS consists of motor neurons that control smooth muscles, cardiac muscles, and glands.

Copy\_of\_StudyGuide\_Brain\_DC.docx - Study Guide Brain to ...

Study Guide - Brain Central Nervous System (CNS): the body's electrochemical communication network, consisting of all the nerve cells. Peripheral Nervous System (PNS): the sensory and motor neurons that connect the central nervous system to the rest of the body Neuron: nerve cells Synapse: The junction between the axon tip of the sending neuron and the dendrite of the receiving neuron.

Nervous System Study Guide - Aurum Science
The Nervous System Functions of the Nervous System 1. Gathers information from both inside and outside the body - Sensory Function 2.

Transmits information to the processing areas of the brain and spine 3. Processes the information in the brain and spine – Integration Function 4.

### Peripheral Nervous System Study Guide

Central and Peripheral Nervous System Study Guide. This study guide is a condensed listing of the major vocabulary words from this chapter, along with a set of practice questions and diagrams similar to what might be on a written test. The questions and vocabulary are roughly written in the same order as they appear in the lecture.

The Nervous System - Science Olympiad Nervous System Study Guide 1. What is the main function of the nervous system? To carry impulses throughout your body; cause a motor response to a sensed stimulus 2. What are the two divisions of the nervous system? Central Nervous System & Peripheral Nervous System

### Describe the structure and function of the peripheral ...

This study Guide is intended to help you study. It is not intended to cover everything you need to know for the tests. Read each chapter before and review the notes before each lecture. CHAPTER 11 FUNDAMENTALS OF NERVOUS SYSTEM & NERVOUS TISSUE Lecture objectives. Functions of the nervous system Organization of the nervous system

Study Guide: Peripheral Nervous System / Quiz

Nervous system (anterior view) In this article, we'll discuss the peripheral nervous system and its divisions, as well as the peripheral nerves. The peripheral nervous system (PNS) consists of all the nerves branching out of the brain and spinal cord (the central nervous system, CNS). If you imagine the CNS as the main highway, then the PNS forms all the connecting secondary roads.

5 Study Guide - Nervous system - KEY - Page 1 of 4 Biology 12 - The Nervous System Study Guide 1. Explain how the nervous system is divided into sub-systems. What is the main function of each sub-system? 2. Draw and label a simple motor neuron and state the function of each labelled part. See Notes 3. What are the three types of neurons?

<u>The Autonomic Nervous System - CliffsNotes</u> <u>Study Guides</u>

Peripheral Nervous System Study Guide 1. Know the difference between a. General senses and special senses. b. Somatic senses and visceral senses. c. Sensation and perception. 2. Be able to classify receptors based on a. Location of stimuli detected b. Type of stimuli detected c. Structure 3. Define adaptation a. Tonic (define and know example) b.
