Manufacturing Whiteness BoD - Books on Demand
In a series of convergent empirical essays, *Manufacturing Whiteness* explores the striking parallels in the social construction of whiteness and gender in colonial depictions of the colonizer/colonized and in contemporary advertising. The past decade

has seen a sincere, if belated, willingness among white male scholars to self-critically examine the oppressive social, cultural, and political implications of their whiteness. Building on Jacques Lacan's powerfully original social-psychoanalytic insights into the role of desire in the fetishistic constitution of the subject-in-language, *Manufacturing Whiteness* offers a sophisticated, yet accessible theoretical method for deconstructing ad-content which enables the reader to trace whiteness, "otherness," and other worldliness to the very constitution of latemodern/postmodern western identity.

The Relationship Between Parapsychology and Gravity is

Volume 2 of J.G. Galimore's series of three handbooks of unusual energies. This book describes in depth the research and theories of J.G. Gallimore into the question of "parapsychology transmission" --the question of how such things as telepathy, remote viewing, ESP, and similar phenomena can physically occur. Gallimore discusses various explanation on how they occur, including the possibility that gravity waves may play a role. He also discusses the various emanations, radiations, and energy fields of all matter and life. This includes the ancient Chinese energy called "chi" (qi), the ancient Indian's prana energy, Reichenback's "odic force", Gurwitsch's "mitogenic radiation", Wilhelm Reich's orgone energy, and other subtle energies of life and matter. Gallimore shows how all of these energies are the same or similar, how they interact, and how they are

related to gravity. He also discusses crystals as transducers of these energies, and provides diagrams of devices that could potentially be used to harness or control these energies.

Top-Down Technicals, Macro Trading, not only builds upon the growing contributions by Arun S. Chopra, CFA, CMT to the world of market research and analysis, it outlines his process, displays his past successes, and highlights the advanced nature of his firm's work. It's a taught and highly informative discussion of the yen

that also serves as the starting point for his forthcoming market observation book series. Inside Top-Down Technicals, Macro Trading, The Yen 2012, financial professionals and enthusiasts will find a detailed explanation of how they can take real-time market information to confirm macro-based trading and investment ideas. Chopra combines past editions of his monthly publication, "The Tape," with a closer look at an entire macro setup in order to create a high-level view of a macroeconomic, top-down technical cycle. The end result aids readers in expanding upon simple, long-term trading levels, and introduces new concepts of how assets trade relative to one another based on macroeconomic principles. His discussion of these long-term charts and macroeconomic relationships, as well as intermarket analysis, shows readers how to optimize the strategies and timeliness of their setups. The result: not only will you better understand Chopra's methodologies, you will also gain practical insight into the potential power of a setup on its

related markets.
