Top-Down Technicals, Macro Trading, not only builds upon the growing contributions by Arun S. Chopra, CFA, CMT to the world of market research and analysis, it outlines his process, displays his past successes, and highlights the advanced nature of his firm's work. It's a taught and highly informative discussion of the yen that also serves as the starting point for his forthcoming market observation book series. Inside Top-Down Technicals, Macro Trading, The Yen 2012, financial professionals and enthusiasts will find a detailed explanation of how they can take real-time market information to confirm macro-based trading and investment ideas. Chopra combines past editions of his monthly publication, "The Tape," with a closer look at an entire macro setup in order to create a high-level view of a macroeconomic, top-down technical cycle. The end result aids readers in expanding upon simple, long-term trading levels, and introduces new concepts of how assets trade relative to one another based on macroeconomic principles. His discussion of these long-term charts and macroeconomic relationships, as well as intermarket analysis, shows readers how to optimize the strategies and timeliness of their setups. The result: not only will you better understand Chopra's methodologies, you will also gain practical insight into the potential power of a setup on its related markets.

Jim Howard has cruised the great oceans of the world for over 25 years, often single-handed.

High-speed Surface Craft Sheridan House, Inc.

The Journal of the Molly B is my personal diary of the building of my dream.

The building of a boat is a simple idea but in practice is more like a labor of love, which exceeds all expectations. The task is at times an overwhelming undertaking, which is reminiscent of the insignificance one feels in the middle of that vast and seemingly endless expanse of water, called an ocean, you feel

so small and so alone. You at times feel as though it's an impossible task. Without the knowledge or experience, to solve the many problems that arise as you proceed along your course toward the completion of your vessel, you are constantly reminded of your shortcomings. I can assure you, it is not an impossible task! It took me 12 years but the Molly B is finally in the water and fulfilling our dream of living on the water. It's well worth the time and effort but you'll never finish it if you don't get started, you just have to take that first step and go for it.
