The Mechanical World

University Press of Kentucky

This comprehensive volume examines the nature, causes, and consequences of state religion policy in 183 countries between 1990 and 2014. Each contribution uses round 3 of the Religion and State dataset

---

which includes information on 117 distinct state religion policies. Secular and religious forces in society and government compete in order to influence state religion policy in a vibrant religious economy. While governments are more involved in religion in 2014 than they were in 1990, most states both added and dropped religion policies during this period. This is important because these policies impact on a number of important political, social, and economic phenomena. In this collection the authors examine the impact of state religion policies on

interstate militarized disputes, violent domestic conflict, terrorism, and voting for political parties. They also examine some of the factors that influence state religion policy, including the attitudes of citizens toward religion and religious minorities, free and open elections, and having an independent judiciary. This book was originally published as a special issue of the journal *Religion, State & Society*. Catalogue of books belonging to the Society of Brothers in Unity; Yale College, Sept. 1832 Newnes Thayer Soule couldn't

believe his orders. As a junior officer with no military training or indoctrination and less than ten weeks of active duty behind him, he had been assigned to be photographic officer for the First Marine Division. The Corps had never had a photographic division before, much less a field photographic unit. But Soule accepted the challenge, created the unit from scratch, established policies for photography, and led his men into combat. Soule and his unit produced films and

---

photos of training, combat action pictures, and later, terrain studies and photographs for intelligence purposes. Though he had never heard of a photo-litho set, he was in charge of using it for map production, which would prove vital to the division. Shooting the Pacific War is based on Soule's detailed wartime journals. Soule was in the unique position to interact with men at all levels of the military, and he provides intriguing closeups of generals, admirals, sergeants, and

privates -everyone he met and he worked with along the way. Though he witnessed the horror of war firsthand, he also writes of the vitality and intense comradeship that he and his fellow Marines experienced. Soule recounts the heat of battle as well as the intense training before and rebuilding after each campaign. He saw New Zealand in the desperate days of 1942. His division was rebuilt in Australia following Guadalcanal. After a stint back in Quantico training more combat photographers,

he went to Guam and then to the crucible of Iwo Jima. At war's end he was serving as Photographic Officer, Fleet Marine Force Pacific, at Pearl Harbor.
