Swarajya Society of Automotive Engineers

Light and Heavy Vehicle Technology, Fourth Edition, provides a complete text and reference to the design, construction and operation of the many and varied components of modern motor vehicles, including the knowledge needed to service and repair them. This book provides incomparable coverage of both cars and heavier vehicles, featuring over 1000 illustrations. This new edition has been brought fully up to date with modern practices and designs, whilst maintaining the information needed to deal with older vehicles. Two entirely new sections of the book provide a topical introduction to alternative power sources and fuels, and battery-electric, hybrid and fuel-cell vehicles. More information on the latest developments in fuel injection, diesel engines and transmissions has also been added. An expanded list of technical abbreviations now contains over 200 entries – a useful resource for professional technicians in their day-to-day work. This book is an essential textbook for all students of automotive engineering, particularly on IMI / C&G 4000 series and BTEC courses and provides all the underpinning knowledge required for NVQs to level 3. By bridging the gap between basic and more advanced treatments of the subject, it also acts as a useful source of information for experienced technicians and technically minded motorists, and will help them to improve their knowledge and skills.

Top-Down Technicals, Macro Trading, not only builds upon the growing contributions by Arun S. Chopra, CFA, CMT to the world of market research and analysis, it outlines his process, displays his past successes, and highlights the advanced nature of his firm's work. It's a taught and highly informative discussion of the yen that also serves as the starting point for his forthcoming market observation book series. Inside Top-Down Technicals, Macro Trading, The Yen 2012, financial professionals and enthusiasts will find a detailed explanation of how they can take real-time market information to confirm macro-based trading and investment ideas. Chopra combines past editions of his monthly publication, "The Tape," with a closer look at an entire macro setup in order to create a high-level view of a macroeconomic, top-down technical cycle. The end result aids readers in expanding upon simple, long-term trading levels, and introduces new concepts of how assets trade relative to one another based on macroeconomic principles. His discussion of these long-term charts and macroeconomic relationships, as well as intermarket analysis, shows readers how to optimize the strategies and timeliness of their setups. The result: not only will you better understand Chopra's methodologies, you will also gain practical insight into the potential power of a setup on its related markets.
