Photo Atlas for Botany
Cengage Learning

With this collection of hundreds of accurate, full-color photographs, you can recapture - and retain - what you've seen in your anatomy and physiology lab. Use this atlas side by side with your lab manual.

These excellent photos have been chosen for their ability to clarify the anatomical structure of the specimens. Away from the lab, the atlas becomes a valuable tool for learning terms and studying for exams. Whether your goal is to better your test scores or to increase your grasp of

the material you learn in the lab setting, Morton and Perry's Photo Atlas for Anatomy and Physiology is key to a successful and understandable lab experience.

Biology Thomson

This four-color lab manual contains 21 lab exercises, most of which can be completed within two hours and require minimal input from the instructor. To provide flexibility, instructors can vary the length of most exercises, many of which are divided into several parts, by deleting portions of the procedure without sacrificing the overall purpose of the experiment. Taking a consistent approach to each exercise, the second edition provides an even clearer presentation, updated coverage, and increased visual support to enable students to apply concepts from the Human Biology course.

Accompanying CD-ROM covers topics in the same order as the text, with a quiz and flashcards for each chapter, as well as hundreds of animations, interactive sequences, and movies, and a link to the publisher's biology website.

Introduction to Biology Laboratory Manual Cengage Learning

This four-color lab manual contains 20 lab exercises, most of which can be completed within two hours and require minimal input from the instructor. To provide flexibility, instructors can

vary the length of most exercises, many of which are divided into several parts, by deleting portions of the procedure without sacrificing the overall purpose of the experiment. Each exercise is cross-referenced with pages in the Starr/McMillan text and the Knapp text and follows this format: Objectives, Introduction, Materials, Procedure (with each step numbered), Pre-lab questions, and Post-lab questions. Instructors can combine black-and-white versions of this manual with

selected exercises in the Shelp lab manual to make a customized one-color manual. They can also include their own exercises.
