Now streaming on Netflix and BBC iPlayer! The Breakfast Club meets Pretty Little Liars in Gretchen McNeil's sharp and thrilling sequel to *Get Even*. Perfect for fans of E. Lockhart, Karen M. McManus, and Maureen Johnson. The members of *Don't Get Mad* aren't just mad anymore . . . they're afraid. And with Margot in a coma and Bree under house arrest, it's up to Olivia and Kitty to try to catch their deadly tormentor. But just as the girls are about to go on the offensive, Ed the Head reveals a shocking secret that turns all their theories upside down. The killer could be anyone, and this time he—or she—is out for more than just revenge. The girls desperately try to discover the killer's identity as their own lives are falling apart: Donté is pulling away from Kitty and seems to be hiding a secret of his own, Bree is sequestered under the watchful eye of her mom's bodyguard, and Olivia's mother is on an emotional downward spiral. The killer is closing in, the threats are becoming more personal, and when the police refuse to listen, the girls have no choice but to confront their anonymous "friend" . . . or die trying.

Foreplay Harper Collins

This book investigates the long-term continuity of large-scale states and empires, and its effect on the Near East's social fabric, including the fundamental changes that occurred to major social institutions. Its geographical coverage spans, from east to west, modern-day Libya and Egypt to Central Asia, and from north to south, Anatolia to southern Arabia, incorporating modern-day Oman and Yemen. Its temporal coverage spans from the late eighth century BCE to the seventh century CE during the rise of Islam and collapse of the Sasanian Empire. The authors argue that the persistence of large states and empires starting in the eighth/seventh centuries BCE, which continued for many centuries, led to new socio-political structures and institutions emerging in the Near East. The primary processes that enabled this emergence were large-scale and long-distance movements, or population migrations. These patterns of social developments are analysed under different aspects: settlement patterns, urban structure, material culture, trade, governance, language spread and religion, all pointing at movement as the main catalyst for social change. This book's argument is framed within a larger theoretical framework termed as 'universalism', a theory that explains many of the social transformations that happened to societies in the Near East, starting from the Neo-Assyrian period and continuing for centuries. Among other influences, the effects of these transformations are today manifested in modern languages, concepts

of government, universal religions and monetized and globalized economies.

Tor/Forge Author Voices: Volume 1 HarperCollins Australia
Luc Cain was born and raised in Hell, but he isn't feeling as demonic as usual lately—thanks to Frannie Cavanaugh and the unique power she never realized she had. But you can't desert Hell without consequences, and suddenly Frannie and Luc find themselves targeted by the same demons who used to be Luc's allies. Left with few options, Frannie and Luc accept the protection of Heaven and one of its most powerful angels, Gabe. Unfortunately, Luc isn't the only one affected by Frannie, and it isn't long before Gabe realizes that being around her is too...tempting. Rather than risk losing his wings, he leaves Frannie and Luc under the protection of her recently-acquired guardian angel. Which would be fine, but Gabe is barely out the door before an assortment of demons appears—and they're not leaving without dragging Luc back to Hell with them. Hell won't give up and Heaven won't give in. Frannie's guardian exercises all the power he has to keep them away, but the demons are willing to hurt anyone close to Frannie in order to get what they want. It will take everything she has and then some to stay out of Hell's grasp. And not everyone will get out of it alive. Taming Demons for Beginners Tor Teen

Frannie Cavanaugh is a good Catholic girl with a bit of a wicked streak. She has spent years keeping everyone at a distance - even her closest friends - and it seems like her senior year is going to be more of the same... Until Luc Cain enrolls in her class. No one knows where he came from, but Frannie can't seem to stay away from him. What she doesn't know is that Luc is on a mission. He's been sent from Hell itself to claim Frannie's soul. It should be easy - all he has to do is get her to sin, and Luc is as tempting as they come. Frannie doesn't stand a chance. But he has to work fast, because if the infernals are after her, the celestials can't be far behind. And sure enough, it's not long before the angel Gabriel shows up, willing to do anything to keep Luc from getting what he came for. But if Luc fails, there will be Hell to pay... for all of them.

The Golden Torc Harper Collins

After a close encounter with a bus, Alona Dare goes from homecoming queen to Queen of the Dead. She 's stuck as a ghost in the land of the living with no sign of the big, bright light to take her to a better place. To make matters worse, the only person who might be able to help her is Will Killian, a total loser outcast. More than anything, Will wishes he didn ' t have the rare ability to communicate with the dead, especially the former mean girl of Groundsboro High. He ' s not filling out any volunteer forms to help her cross to the other side, though it would bring him some welcome peace and quiet. Can they get over their mutual distrust -- and quasi-attraction -- to work together? Readers of this spirited paranormal comedy won't

want this odd couple to ever part.

Barriers and Opportunities for 2-Year and 4-Year STEM Degrees Macmillan

Nearly 40 percent of the students entering 2- and 4-year postsecondary institutions indicated their intention to major in science, technology, engineering, and mathematics (STEM) in 2012. But the barriers to students realizing their ambitions are reflected in the fact that about half of those with the intention to earn a STEM bachelor's degree and more than two-thirds intending to earn a STEM associate's degree fail to earn these degrees 4 to 6 years after their initial enrollment. Many of those who do obtain a degree take longer than the advertised length of the programs, thus raising the cost of their education. Are the STEM educational pathways any less efficient than for other fields of study? How might the losses be "stemmed" and greater efficiencies realized? These questions and others are at the heart of this study. Barriers and Opportunities for 2-Year and 4-Year STEM Degrees reviews research on the roles that people, processes, and institutions play in 2-and 4-year STEM degree production. This study pays special attention to the factors that influence students' decisions to enter, stay in, or leave STEM majors â €"quality of instruction, grading policies, course sequences, undergraduate learning environments, student supports, co-curricular activities, students' general academic preparedness and competence in science, family background, and governmental and institutional policies that affect STEM educational pathways. Because many students do not take the traditional 4-year path to a STEM undergraduate degree, Barriers and Opportunities describes several other common pathways and also reviews what happens to those who do not complete the journey to a degree. This book describes the major changes in student demographics; how students, view, value, and utilize programs of higher education; and how institutions can adapt to support successful student outcomes. In doing so, Barriers and Opportunities questions whether definitions and characteristics of what constitutes success in STEM should change. As this book explores these issues, it identifies where further research is needed to build a system that works for all students who aspire to STEM degrees. The conclusions of this report lay out the steps that faculty, STEM departments, colleges and universities, professional societies, and others can take to improve STEM education for all students interested in a STEM degree.

Night School HarperCollins

If you abandon your life to discover yourself, can you discover your life by abandoning yourself? One October morning, Dave Cicirelli announced on Facebook that he was quitting his job and heading west. Many thought him brave-or crazy. No one guessed he was lying. Fed up with Facebook's superficiality, Dave fictionalized his profile. "Fake Dave" set off on a wild adventure, including TP'ing an Amish horse and buggy and being kidnapped by a religious cult. But what began as a prank quickly became a social experiment. Hundreds of people started following and connecting over Fake Dave's journey. Meanwhile, the real Dave was increasingly isolated by this secret and its implications. Hilarious and profoundly honest, FAKEBOOK explores our cultural obsession with social media and its powerful impact on our relationships, both online and in real life.

Demons Akashic Books

Humanity pushed its way to the stars - and encountered the Gbaba, a ruthless alien race that nearly wiped us out. Earth and her colonies are now smoldering ruins, and the few survivors have fled to distant, Earth-like Safehold, to try to rebuild. But the Gbaba can detect the emissions of an industrial civilization, so the human rulers of Safehold have taken extraordinary measures: with mind control and hidden high technology, they've built a religion in which every Safeholdian believes, a religion designed to keep Safehold society medieval forever. 800 years pass. In a hidden chamber on Safehold, an android from the far human past awakens. This "rebirth" was set in motion centuries before, by a faction that opposed shackling humanity with a concocted religion. Via automated recordings, "Nimue" - or, rather, the android with the memories of Lieutenant Commander Nimue Alban - is told her fate: she will emerge into Safeholdian society, suitably disguised, and begin the process of provoking the technological progress which the Church of God Awaiting has worked for centuries to prevent. Nothing about this will be easy. To better deal with a medieval society, "Nimue" takes a new gender and a new name, "Merlin." His formidable powers and access to caches of hidden high technology will need to be carefully concealed. And he'll need to find a base of operations, a Safeholdian country that's just a little more freewheeling, a little less orthodox, a little more open to the new. And thus Merlin comes to Charis, a mid-sized kingdom with a talent for naval warfare. He plans to make the acquaintance of King Haarahld and Crown Prince Cayleb, and maybe, just maybe, kick off a new era of invention. Which is bound to draw the attention of the Church...and, inevitably, lead to war. It's going to be a long, long process. And David Weber's epic *Off Armageddon Reef* is can't-miss sci-fi. Second in the series that portrays "one of the best-thought-out futures ever encountered in science fiction" from the author of *The Many-Colored Land* (Joe Haldeman). Six million years in the past, a proto-Europe is inhabited by two extraterrestrial races, the chivalric Tanu and the dwarfish, forest-dwelling Firvulag—both of which possess far-reaching psychic powers. But now, time-traveling humans from a future society have become involved in the age-old struggle between the two. One group of captured humans is brought to Muriah, the stately capital of the Tanu kingdom. Among them is Elizabeth Orme, who was once, in her own world, a Grand Master Metapsychic. In spite of Tanu harassment, she begins to recover her lost powers. The other human group, which has managed to overcome its Tanu guards and escape into the northern forests, includes Chief Burke, a Native American, and Felice Uindry, an athlete gifted with certain psychic powers of her own. This group, with the ambiguous aid of the Firvulag, determines to launch an attack against the very heart of Tanu dominance. At the end of the Grand Combat tournament between Tanu and Firvulag comes the astonishing climax to this astonishing novel. Praise for the *Saga of Pliocene Exile*

A century later, Josephine Lang, a prodigiously talented pianist and dedicated composer, participated at various times in the German Romantic world of lieder through her important arts salon. Lastly, the twentieth century brought forth two exceptional women: Baroness Maria Bach, a composer and pianist of twentieth-century Vienna's upper bourgeoisie and its brilliant musical milieu in the era of Gustav Mahler, Richard Strauss, Arnold Schoenberg, and Erich Korngold; and Ann Schein, a brilliant and dauntless American piano prodigy whose career, ongoing today though only partially recognized, led her to study with the legendary virtuosos Arthur Rubinstein and Myra Hess.
