Money-related stress dates as far back as concepts of money itself. Formerly it may have waxed and waned in tune with the economy, but today more individuals are experiencing financial mental

anguish and self-destructive behavior regardless of bull or bear markets, recessions or boom periods. From a fringe area of psychology, financial therapy has emerged to meet increasingly salient concerns. Financial Therapy is the first full-length guide to the field, bridging theory, practical methods, and a growing cross-disciplinary evidence base to create a framework for improving this crucial aspect of clients' lives. Its contributors identify money-based disorders such as compulsive buying, financial hoarding, and workaholism, and analyze typical early experiences and the resulting mental constructs ("money scripts") that drive toxic relationships with money. Clearly relating financial stability to larger therapeutic goals, therapists from varied perspectives offer practical tools for assessment and intervention, advise on cultural and ethical considerations, and provide instructive case studies. A diverse palette of research-based and practice-based models meets monetary mental health issues with well-known treatment approaches, among them: Cognitive-behavioral

and solution-focused therapies.
Collaborative relationship models.
Experiential approaches.
Psychodynamic financial therapy.
Feminist and humanistic approaches. Stages of change and motivational interviewing in financial therapy. A text that serves to introduce and define the field as well as plan for its future, Financial Therapy is an important investment for professionals in psychotherapy and counseling, family therapy, financial planning, and social policy.

But in a culture full of bad advice, predatory banks, and splurge-now-pay-later temptations, it can also be extremely dangerous—leading you to make financial decisions that could hurt you for years to come. Combine this with a slumped economy, mounds of student loans, and dubious examples from reality TV stars to politicians to your own parents, and it 's no wonder so many twenty-somethings are struggling. Twenty-three-year-old Zac Bissonnette—the author of Debt-Free U—knows exactly what you 're going through. He demystifies the many traps young people fall victim to in their post-college years. He offers fresh insights on everything from job hunting to buying a car to saving*

for retirement that will give you a foundation for a secure, stable, and happy life. In the process, he reveals why FICO scores are overrated, online job applications are a waste of time, car loans are for suckers, and credit card rewards are a scam. With detours to discuss wine connoisseurs, Really Broke Housewives, and Lenny Dykstra, Zac shows you how to make better choices today so you can be richer, smarter (and better-looking!) for years to come.
