Chapter 7 Success Pearson Higher Education AU

This training circular is designed for soldiers in the active component (AC) and the reserve component (RC) (which includes the Army National Guard (ARNG) and the United States Army Reserve (USAR). It explains the Army's pay system and answers questions concerning basic financial matters. At the end of each chapter there are practical exercises covering the material in the chapter. Chapter 8 contains answers to all of the practical exercises. This training circular will help soldiers understand the military pay and travel systems, spending and saving, investments, and, most importantly, assist soldiers in preparing for financial readiness--in peacetime and during any type of deployment. Remember that this is a guide to be used by all soldiers. Chapter 1 explains the monthly pay and allowances soldiers are entitled to as well as the monthly deductions from their pay. These deductions include taxes as well as voluntary deductions such as allotments and charitable donations. This chapter gives an overview to all soldiers on how the Army pay system works,

what entitlements soldiers receive, how soldiers receive their pay, and programs offered for retirement. Chapter 2 outlines the entitlements for Active Component (AC) and Active Guard/ Reserve (AGR) soldiers on active duty and answers specific questions about individual Leave and Earning Statements (LESs), the mid-month Net Pay Advice (NPA), and additional entitlements for deployed soldiers. Chapter 3 outlines the entitlements for RC soldiers and answers questions about entitlements, individual LESs, the mid-month NPA, and mobilization allowances. Chapter 4 explains travel pay, how to file travel claims and shows block by block how to complete a travel voucher. Chapter 5, which is probably the most important chapter of this circular, tells soldiers and their families how to prepare for deployment. Chapter 6 explains credit and banking services as well as offers practical advice on establishing and utilizing credit and various banking services. Chapter 7 covers budgeting techniques and general information on investments. The final chapter, chapter 8, contains the answers to the practical exercises, which are located at the end of each chapter. Appendix A is for unit commanders. It outlines differences in the AC and RC pay systems and provides an excellent training tool for Commanders' use when introducing new soldiers to the Army pay system. This publication uses both narrative and question-and-answer formats to present information. Read each question as if you were asking it yourself. Review the answers and if you come across an answer you do not understand or if you have further questions, which are not answered in this circular, talk to your chain-of-command. If your leaders don't know the answer, they will assist you in getting the right answer. You are encouraged to read this entire publication and complete the practical exercises at the end of each chapter. After completing the exercises, keep this circular handy as a reference. The proponent for this publication is the U.S. Army Finance School.

On the Social Web, people share their enthusiasms and expertise on almost every topic, and based on this, learners can find resources created by individuals with varying expertise.

Through this trend and the wide availability of video cameras and authoring tools, people are creating DIY resources and sharing their knowledge, skills, and abilities broadly. While these resources are increasing in availability, what has not been explored is the effectiveness of these resources, peer-to-peer teaching and learning, and how well this content prepares learners for professional roles. Practical Peer-to-Peer Teaching and Learning on the Social Web explores the efficacies of online teaching and learning with materials by peers and provides insights into what is made available for teaching and learning by the broad public. It also considers intended and unintended outcomes of open-shared learning online and discusses practical ethics in teaching and learning online. Covering topics such as learner roles and instructional design, it is ideal for teachers, instructional designers and developers, software developers, user interface designers, researchers, academicians, and students.

Although we have been successful in our careers, they have not turned out quite as we expected. We both have changed positions several times-for all the right reasons-but there are no pension plans vesting on our behalf. Our retirement funds are growing only through our individual contributions. Michael and I have a wonderful marriage with three great children. As I write this, two are in college and one is just beginning high school. We have spent a fortune making sure our children have received the best education available. One day in 1996,

one of my children came home disillusioned with school. He was bored and tired of studying. "Why should I put time into studying subjects I will never use in real life?" he protested. Without thinking, I responded, "Because if you don't get good grades, you won't get into college." "Regardless of whether I go to college," he replied, "I'm going to be rich."
