with the skills they need to practice the historian's craft in the digital age, while never losing sight of the fundamental values and techniques that have defined historical scholarship for centuries. Zachary Schrag begins by explaining how to ask good questions and then guides readers step-by-step through all phases of historical research, from narrowing a topic and locating sources to taking notes, crafting a narrative, and connecting one's work to existing

scholarship. He shows how researchers extract knowledge from the widest range of sources, such as government documents, newspapers, unpublished manuscripts, images, interviews, and datasets. He demonstrates how to use archives and libraries, read sources critically, present claims supported by evidence, tell compelling stories, and much more. Featuring a wealth of examples that illustrate the methods used by seasoned experts, The Princeton

Guide to Historical Research reveals that, however varied the subject matter and sources, historians share basic tools in the quest to understand people and the choices they made. Offers practical step-by-step guidance on how to do historical research, taking readers from initial questions to final publication. Connects new digital technologies to the traditional skills of the historian. Draws on hundreds of examples from a broad range of

Reconceptualizing the Literacies in Adolescents' Lives, Second Edition focuses on exploring the impact of young people's identity-making practices in mediating their perceptions of themselves as readers and writers in an era of externally mandated reforms. What is different in the Second Edition is its emphasis on the importance of valuing adolescents' perspectives--in an era of skyrocketing interest in improving literacy instruction at the middle and high

<p>school levels driven by externally mandated reforms and accountability measures. A central concern is the degree to which this new interest takes into account adolescents' personal, social, and cultural experiences in relation to literacy learning. In this new edition of <i>Reconceptualizing the Literacies in Adolescents' Lives</i> students' voices and perspectives are featured front and center in every chapter. Particular attention is given throughout to multiple literacies --especially how information and new</p>	<p>communication technologies are changing learning from and with text. Nine of the 15 chapters are new; all other chapters are thoroughly updated. The volume is structured around four main themes: * <i>Situating Adolescents' Literacies</i> – addressing how young people use favorite texts to perform their identities; how they counter school-based constructions of incompetence; and how they re/construct their literate identities in relation to certain kinds of gendered expectations, pedagogies, and cultural</p>	<p>resources; * <i>Positioning Youth as Readers and Writers</i> – stressing the importance of classroom discourse, cultural capital, agency, and democratic citizenship in mediating adolescents' literate identities; * <i>Mediating Practices in Young People's Literacies</i> – looking at issues of language, social class, race, and culture in shaping how adolescents represent themselves and are represented by others; and * <i>Changing Teachers, Teaching Changes</i> – capturing the productive ambiguities associated with</p>
