This timely set traces the
evolution of social
marketing from its deep

roots in psychology, religion, and politics to its current role as an influencer of societal and behavioral change. • Includes contributions from scholars in the fields of marketing, psychology, health communications, sociology, environmental sustainability, economics, statistics, law, advertising, and journalism • Explains how to plan a campaign to encourage and facilitate behavioral change • Offers a rich set of applications in a wide

variety of settings, including health, environment, family planning, food, well-being, and economic development, all with deep philosophic and theoretical grounding • Illuminates the variety of philosophical approaches to social marketing ranging from the idea that awareness alone can bring about change, to the view that persistent nudging will deliver results, to the position that only strong social control can create

The UN Convention on the Rights of the Child is acknowledged as a landmark in the development of children's rights. Article 3 makes the child's best interests a primary

consideration in all actions concerning children and requires States Parties to ensure their care and protection. This volume, written by experts in children's rights from a range of jurisdictions, explores the implementation of Article 3 around the world. It opens with a contextual analysis of Article 3, before offering a critique of its implementation in various settings, including parenting, religion, domestic violence and baby switching. Amongst the themes that emerge are the challenges posed by the content of 'best interests', 'welfare' and 'well-being'; the priority to be accorded them; and the legal, socioeconomic and other obstacles to legislating for children's rights. This book is essential for all

readers who interact with one of the Convention's most fundamental principles.

web-based solutions
nowadays. The
providers need to
ensure security and

privacy of user data. To that end, passwords are still the most common authentication method on the web. They are inexpensive and easy to implement. Users are largely accustomed to this kind of authentication but passwords represent a considerable nuisance, because they are tedious to create, remember, and maintain. In many cases, usability issues turn into security

problems, because users so passwords will try to work around the challenges and create easily predictable credentials. Often, they reuse their passwords for many purposes, which aggravates the risk of identity theft. There have been numerous attempts to remove the root of the problem and replace passwords, e.g., through biometrics. However, no other authentication strategy can fully replace them,

probably stay a go-to authentication method for the foreseeable future. Researchers and practitioners have thus aimed to improve users' situation in various ways. There are two main lines of research on helping users create both usable and secure passwords. On the one hand, password policies have a notable impact on password practices, because they enforce

certain characteristics. However, enforcement reduces users' autonomy and often causes frustration if the requirements are poorly communicated or overly complex. On the other hand, user-centered designs have been proposed: Assistance and persuasion are typically more user-friendly but their influence is often limited. In this thesis, we explore potential reasons for the

inefficacy of certain persuasion strategies. From the gained knowledge, we derive novel persuasive design elements to support users in password authentication. The exploration of contextual factors in password practices is based on four projects that reveal both psychological aspects and real-world constraints. Here, we investigate how mental models of password

strength and password managers can provide important pointers towards the design of persuasive interventions. Moreover, the associations between personality traits and password practices are evaluated in three user studies. A meticulous audit of real-world password policies shows the constraints for selection and reuse practices. Based on the review of context

factors, we then extend the design space of persuasive password support with three projects. We first depict the explicit and implicit user needs in password support. Second, we craft and evaluate a choice architecture that illustrates how a phenomenon from marketing psychology can provide new insights into the design of nudging strategies. Third, we tried to empower users to

create memorable passwords with emojis. The results show the challenges and potentials of emoji-passwords on different platforms. Finally, the thesis presents a framework for the persuasive design of password support. It aims to structure the required activities during the entire process. This enables researchers and practitioners to craft novel systems that go

beyond traditional paradigms, which is illustrated by a design exercise.

must be maintained and supported as a vital means of promoting international child welfare.

International adoption is in a state of virtual collapse, rates having fallen by more than half since 2004 and continuing to fall. Yet around the

world millions of orphaned and vulnerable children need permanent homes, and thousands of their birth families are eager to take them in. Many American and European families are eager to take them in. Many government officials, international bureaucrats, and social commentators claim these adoptions are not "in the best interests" of the child. They claim that adoption deprives children of their "birth culture," threatens their racial identities, and even encourages widespread child trafficking.

Celebrity adopters are publicly excoriated for stealing children from their birth families. This book argues that opposition to adoption ostensibly based on the well-being of the child is often a smokescreen for protecting national pride. Concerns about the harm done by transracial adoption are largely inconsistent with empirical evidence. As for trafficking, opponents of international adoption want to shut it down because it is too much

like a market for children. But this book offers a radical challenge to this view—that is, what if instead of trying to suppress market forces in international adoption, we embraced them so they could be properly regulated? What if the international system functioned more like open adoption in the United States, where birth and adoptive parents can meet and privately negotiate the exchange of parental rights? This

arrangement, the authors argue, could eliminate the abuses that currently haunt international adoption. The authors challenge the prevailing wisdom with their economic analyses and provocative analogies from other policy realms. Based on their own family's experience with the adoption process, they also write frankly about how that process feels for parents and children.

This research intends to explore the rhetorical strategies used by adoption agencies in their information packets. These marketing materials are designed to influence the choices made by the prospective adopting parent/s. By using a qualitative methodological

approach, this research project intends to determine the classical rhetorical methods used by adoption agencies to attract prospective adopters. The methods of classical persuasion within adoption agencies' advertising material is an unexplored content area with rich

rhetorical features. The study enters this fascinating genre of adoption material of real world writing in a nonacademic field. Exploring adoption agencies' materials and the possible ways that they can present persuasive information helps fill a niche in the field of rhetoric and composition in this area of real world writing. The

study concluded that the analyzed marketing materials utilize all of the Aristotelian persuasive appeals, pathos, ethos and logos. Even though the level and of these persuasive tactics varied in each packet, their presence is found in nearly every area of discussion. **Too Scared To Cry** Vanderbilt University Press
