In *Writers at Work: The Essay*, college and university students use the process approach to write different genres of essays common at the post-secondary level, the most important being expository writing, persuasive writing, and timed essay exams. Each chapter uses the same five-step approach to writing that is used in the two lower-level books. In each chapter, students analyze a model essay, noticing key

organizational and linguistic features; brainstorm ideas; write multiple drafts; revise their work; engage in peer reviews; and share their finished work. Chapters recycle and build upon previously taught material.

'Building Arguments' offers a fresh new approach to informal logic - successfully combining an accessible style with a rigorous, systematic treatment of argument: -It integrates reasoning and writing, teaching readers to argue effectively and communicate ideas in persuasive prose. -It combines fundamental topics of critical thinking into broader discussions of reasoning. So where

other books may treat fallacy identification and avoidance, induction and deduction, and validity and soundness as ends in themselves, 'Building Arguments' presents these topics in a practical yet philosophically sound context. -It includes entertaining and relevant examples and exercises drawn from sports, popular advertising, current events, and many academic areas.

- 'Building Arguments' is unique in its emphasis on helping readers to develop their own persuasive arguments as well as to evaluate arguments from other sources. Using a writing level and organization guided by the principles of reading development, the author introduces material gradually - moving from a very accessible level to a more rigorous one. The result? A book unique in its ability to foster philosophically-based argument analysis while promoting reasoning and writing skills across the curriculum.
