This journal is a 40-day journey to find your identity. By the time you complete Day 40, you will have met the person you lost so long ago. You will have become reacquainted with who you really are, and you are going to like who you see! /div

40 Days to Starting Over
HarperCollins

In this paperback edition is a foreword by activist and author John Robbins and a reader's group study guide. This ground-breaking work, voted one of the top ten books of 2010 by VegNews Magazine, offers an absorbing look at why and how humans can so wholeheartedly devote ourselves to certain animals and then allow others to suffer needlessly, especially those slaughtered for our consumption. Social

psychologist Melanie Joy explores the many ways we numb ourselves and disconnect from our natural empathy for farmed animals. She coins the term "carnism" to describe the belief system that has conditioned us to eat certain animals and not others. In *Why We Love Dogs, Eat Pigs, and Wear Cows* Joy investigates factory farming, exposing how cruelly the animals are treated, the hazards that meatpacking workers face,

and the environmental impact of raising 10 billion animals for food each year. Controversial and challenging, this book will change the way you think about food forever.

#1 New York Times Bestseller In this pathbreaking guide, two of the world ' s most popular and trusted pet care advocates reveal new science to teach us how to delay aging and provide a long, happy, healthy life for our canine companions. Like their human counterparts, dogs have been getting sicker and dying prematurely

over the past few decades. Why? Scientists are beginning to understand that the chronic diseases afflicting humans—cancer, obesity, diabetes, organ degeneration, and autoimmune disorders—also beset canines. As a result, our beloved companions are vexed with preventable health problems throughout much of their lives and suffer shorter life spans. Because our pets can't make health and lifestyle decisions for themselves, it's up to pet parents to make smart, science-backed choices for lasting vitality and health. The Forever Dog gives us the practical, proven tools to protect our loyal four-legged companions. Rodney Habib and Karen Becker, DVM, globetrotted (pre-pandemic) to galvanize the best wisdom from top geneticists, microbiologists, and longevity researchers; they also interviewed people whose dogs have lived into their 20s and even 30s. The result is this unprecedented and comprehensive guide, filled with surprising information, invaluable advice, and inspiring stories about dogs and the people who love them. The Forever Dog prescriptive plan focuses on diet and nutrition, movement, environmental exposures, and stress reduction, and can be tailored to the genetic predisposition of particular breeds or mixes. The authors discuss various types of

food—including what the commercial manufacturers don't want us to know—and offer recipes, easy solutions, and tips for making sure our dogs obtain the nutrients they need. Habib and Dr. Becker also explore how external factors we often don't think about can greatly affect a dog's overall health and wellbeing, from everyday insults to the body and its physiology, to the role our own lifestyles and our vets' choices play.	Indeed, the health equation works both ways and can travel "up the leash." Medical breakthroughs have expanded our choices for canine health—if you know what they are. This definitive dog-care guide empowers us with the knowledge we need to make wise choices, and to keep our dogs healthy and happy for years to come.
