*Workbook for Radiation Protection in Medical Radiography - E-Book* Elsevier Health Sciences

Gary Chapman and Rick Osborne help children learn about the importance of love in this wonderfully imaginative and classically illustrated children's hardcover book featuring four-color illustrations (with hidden details!) by Wilson Williams, Jr., and based on Gary's bestselling *The 5 Love Languages*. Each child in this entertaining and playful story learns that they have a primary love language that when "spoken" by others, makes them feel loved. As the five children in the story interact with Mr. Chapman and the unique animals at his special zoo/museum/theme park/birthday party palace, they come to understand their own love language! Readers, especially children ages 5-8, are sure to recognize their own love language as the story develops, and at the end of the book is a fun quiz that will help parents and children identify their own love language. The cast of child characters in this whimsical story include: Penny, Peyton's twin sister, who receives love best when others spend quality time with her. Mr. Chapman introduces Penny to Horace, a Ragdoll Cat who just wants to be with Penny. Jayla, one of Penny's close friends, is always saying nice things about people. Her love language is words of affirmation. Jayla's perfect pet pal is Pamela, an African Grey Parrot, who repeats the nice things Jayla says about others. Kevin, one of Peyton's close friends, enjoys giving things to people. So does his special pet Chipo, a Capuchin Monkey! Sofia loves to pet the animals, and to show her love for others with special hugs. Physical touch is Sofia's love language.

What do class pets get up to when students aren't around? Adventure -- and lots of trouble! Class 5B has a substitute teacher -- and he's the worst! Fuzzy might just be 5B's pet guinea pig, but he will not stand by while his kids suffer. With the help of the Class Pets Club, Fuzzy is going to drive the terrible sub out of town ... or lose his whiskers trying!

**Essentials of Nuclear Medicine and Molecular Imaging E-Book** Elsevier Health Sciences

From the author of the picture book phenomenon *The Invisible String* comes a moving companion title about coping with grief when a pet dies. "When our pets aren't with us anymore, an Invisible Leash connects our hearts to each other. Forever." That's what Zack's friend Emily tells him after his dog dies. Zack doesn't believe it. He only believes in what he can see. But on an enlightening journey through their neighborhood--and through his grief--he comes to feel the comforting tug of the Invisible Leash. And it feels like love. Accompanied by tender, uplifting art by Joanne Lew-Vriethoff, bestselling author Patrice Karst's gentle story uses the same bonding technique from her classic book *The Invisible String* to help readers through the experience of the loss of a beloved animal.

Math & Reading Workbook, Grade 2 Workman Publishing

Handbook of Veterinary Neurology provides quick access to vital information on neurologic

conditions in a wide range of species, including canine, feline, bovine, caprine, equine, ovine, and porcine. A problem-oriented approach makes it easy to diagnose and treat neurologic problems in small and large animals. The coverage of disorders by problem, not by established disease diagnosis, emulates how animals present to the veterinary hospital and simplifies the formulation of a correct diagnosis. Within each chapter, discussions of neurologic disease include a review of the localization criteria and the diseases that can cause that problem, plus treatment and surgical techniques. Lead author Michael D. Lorenz brings decades of experience to neurologic assessment, using a diagnostic approach that requires minimal knowledge of neuroanatomy. - A problem-based approach is organized by presenting sign rather than by condition, guiding you to logical conclusions regarding diagnosis and treatment. - Algorithms diagram the logic necessary to localize lesions and to formulate diagnostic plans. - Coverage of current diagnostic techniques includes the use of diagnostic tools, such as radiology, spinal fluid analysis, electrodiagnosis, and MR imaging. - Case histories in each chapter present a problem and the results of the neurologic examination, then ask you to solve the problem by localizing the lesion, listing probable causes, and making a diagnostic plan. Answers are provided at the back of the book. - A consistent format for each case history includes signalment, history, physical examination findings, and neurologic examination. - A comprehensive appendix describes species and breeds that have a congenital predisposition for particular neurologic diseases. - Extensive references make it easy to pursue in-depth research of more advanced topics. - A companion website includes 20 narrated video clips with accompanying PowerPoint slides that correlate to the case histories in the book, covering neurologic assessment and clinical problems such as paresis of one limb, tetraparesis, stupor, seizures, ataxia of the head and limbs, and cranial nerve disorders. - Two new co-authors, Jean Coates and Marc Kent, board-certified in neurology, enhance the credibility of this edition. - A full-color design and numerous illustrations include enhanced images of neuroanatomy and pathology.

**Eight Dates** Little, Brown Books for Young Readers

Kid's Box is a six-level course for young learners. Bursting with bright ideas to inspire both teachers and students, Kid's Box American English gives children a confident start to learning English. PET Direct Workbook with Answers Elsevier Health Sciences

Whether you're newly together and eager to make it work or a longtime couple looking to strengthen and deepen your bond, *Eight Dates* offers a program of how, why, and when to have eight basic conversations with your partner that can result in a lifetime of love. "Happily ever after" is not by chance, it's by choice—the choice each person in a relationship makes to remain open, remain curious, and, most of all, to keep talking to one another. From award-winning marriage researcher and bestselling author Dr. John Gottman and fellow researcher Julie Gottman, *Eight Dates* offers an ingenious and simple-to-implement approach to effective relationship communication. Here are the subjects that every serious couple should discuss: Trust. Family. Sex and intimacy. Dealing with conflict. Work and money. Dreams, and more. And here is how to talk about them—how to broach subjects that are difficult or embarrassing, how to be brave enough to say what you really feel. There are also suggestions for where and when to go on each date—book your favorite romantic restaurant for the Sex & Intimacy conversation (and maybe go to a yoga or dance class beforehand). There are questionnaires, innovative exercises, real-life case studies, and skills to master, including the Four Skills of Intimate Conversation and the Art of Listening. Because making love last is not about having a certain feeling—it's about both of you being active and involved.
