NATIONAL BOOK AWARD FINALIST • STONEWALL BOOK AWARD WINNER • ONE OF TIME MAGAZINE'S 100 BEST YA BOOKS OF ALL TIME NAMED ONE OF THE BEST BOOKS OF THE YEAR by The New York Times • Time • Buzzfeed • NPR • New York Public Library • Publishers Weekly • School Library Journal A genre-defying novel from the award-winning author NPR describes as "like [Madeline] L'Engle...glorious." A singular book that explores themes of identity and justice. Pet is here to hunt a monster. Are you brave enough to look? There are no monsters anymore, or so the children in the city of Lucille are taught. Jam and her best friend, Redemption, have grown up with this lesson all their life. But when Jam meets Pet, a creature made of horns and colors and claws, who emerges from one of her mother's paintings and a drop of Jam's blood, she must reconsider what she's been told. Pet has come to hunt a monster, and the shadow of something grim lurks in Redemption's house. Jam must fight not only to protect her best friend, but also to uncover the truth, and the answer to the question--How do you save the world from monsters if no one will admit they exist? A riveting and timely young adult debut novel that asks difficult questions about what choices you can make when the society around you is in denial. "[A] beautiful, genre-expanding debut" —The New York Times "The word hype was invented to describe books like this." —Refinery29

A Guide for Using the Call of the Wild in the Classroom Pet Friendly Publications

This is not a dictionary - and nor is it an encyclopedia. It is a reference and compendium of useful information about the converging worlds of computers, communications, telecommunications and broadcasting. You could refer to it as a guide for the Information Super Highway, but this would be pretentious. It aims to cover most of the more important terms and concepts in the developing discipline of Informatics - which,

in my definition, includes the major converging technologies, and the associated social and cultural issues. Unlike a dictionary, this handbook makes no attempt to be 'prescriptive' in its definitions. Many of the words we use today in computing and communications only vaguely reflect their originations. And with such rapid change, older terms are often taken, twisted, inverted, and mangled, to the point where any attempt by me to lay down laws of meaning, would be meaningless. The information here is 'descriptive' - I am concerned with usage only. This book therefore contains keywords and explanations which have been culled from the current literature - from technical magazines, newspapers, the Internet, forums, etc. This is the living language as it is being used today - not a historical artifact of 1950s computer science.
