Face it--words matter when it comes to getting noticed, getting the interview, and getting the job. In this invaluable guide to crafting the pitch that opens doors, staffing experts Schuman and Nadler give you hundreds of tools to make that happen. You will no longer struggle to find the phrases that best highlight your achievements; instead, you'll garner attention with such smart options as: I created a program that accomplished the following . . . My work generated \$5 million in revenue . . . I built a team of employees who created . . . The work I did saved my company \$3 million . . . I solved the following problems for my employer . . . The market's tight, but the jobs are out there. With these essential words and phrases, you can move your application to the

top of the pile!

Outdoor Careers Graphic Communications Group

The social probability theories, and historical & natural observations contained in this book were developed over many years and others are based on observations and current events in history. I have also included two new products I discovered while living in my native country of Saint Lucia. Additionally, I review the world, its beauty, and its history. Humanity has reached a milestone. While in Saint Lucia, I noted several alien sightings and have shared my observations of these sightings through this book. I reviewed many natural and historical observations, have looked at the world, and saw the wonder it contains. The reader will see references to "Mind Probe technology". This technology is used by governments with the technology to conduct systematic checks on people of interest. I became aware of the technology while living in Saint Lucia because of the alien sightings, I witnessed and the conclusions I drew from those sightings. It is imperative that, as a society, we do not perceive these alien visitors as a threat. It is my summation that they can be the harbingers of great technology and enhanced medical care that will benefit

---

humanity. I hope that with the writing of this book, the scientific community and committee that discusses these phenomena will welcome me as a member because I believe I can contribute greatly to their investigation of the alien presence that I surmise have been visiting earth for thousands if not millions of years.
