From the legendary author of *Things Fall Apart* comes a long-awaited memoir about coming of age with a fragile new nation, then watching it torn asunder in a tragic civil war. The defining experience of Chinua Achebe's

life was the Nigerian civil war, also known as the Biafran War, of 1967–1970. The conflict was infamous for its savage impact on the Biafran people, Chinua Achebe's people, many of whom were starved to death after the Nigerian government blockaded their borders. By then, Chinua Achebe was already a world-renowned novelist, with a young family to protect. He took the Biafran side in the conflict and served his government as a roving cultural ambassador, from which vantage he absorbed the war's full horror. Immediately after, Achebe took refuge in an academic post in the United States, and for more than forty years he has maintained a considered silence on the events of those terrible years, addressing them

only obliquely through his poetry. Now, decades in the making, comes a towering reckoning with one of modern Africa's most fateful events, from a writer whose words and courage have left an enduring stamp on world literature. Achebe masterfully relates his experience, both as he lived it and how he has come to understand it. He begins his story with Nigeria's birth pangs and the story of his own upbringing as a man and as a writer so that we might come to understand the country's promise, which turned to horror when the hot winds of hatred began to stir. To read *There Was a Country* is to be powerfully reminded that artists have a particular obligation, especially during a time of war. All writers,

Achebe argues, should be committed writers—they should speak for their history, their beliefs, and their people. Marrying history and memoir, poetry and prose, *There Was a Country* is a distillation of vivid firsthand observation and forty years of research and reflection. Wise, humane, and authoritative, it will stand as definitive and reinforce Achebe's place as one of the most vital literary and moral voices of our age.

The Firmware Handbook provides a comprehensive reference for firmware developers looking to increase their skills and productivity. It addresses each critical step of the development process in detail, including how to optimize hardware design for better firmware. Topics covered include real-time issues, interrupts and ISRs, memory management (including Flash memory), handling both digital and analog peripherals, communications interfacing, math subroutines, error handling, design tools, and troubleshooting and debugging.

This book is not for the beginner, but rather is an in-depth, comprehensive one-volume reference that addresses all the major issues in firmware design and development, including the pertinent hardware issues.

Included CD-Rom contains all the source code used in the design examples, so engineers can easily use it in their own designs

The text has been divided in two volumes:

Volume I (Ch. 1-13) & Volume II (Ch. 14-22).

In addition to the review material and some basic topics as discussed in the opening chapter, the main text in Volume I covers topics on infinite series, differential and integral calculus, matrices, vector calculus, ordinary differential equations, special functions and Laplace transforms. Volume II covers topics on complex analysis, Fourier analysis, partial differential equations and statistics. The present book has numerous distinguishing features over the already existing books on the same topic. The chapters have been planned to create interest among the readers to study and apply the mathematical tools. The subject has been presented in a very lucid and precise manner with a wide variety of examples and exercises, which would

eventually help the reader for hassle free study. Foreign Direct Investment in Latin America Haynes Publishing

Theory and Construction of a Rational Heat Motor I. K. International Pvt Ltd

This must-read for lovers of Stephen King's *The Shining* will leave readers breathless as Seda and her family find themselves at the mercy of a murderer in an isolated and snowbound hotel. Get ready for what Kirkus calls "A bloody, wonderfully creepy scare ride." When her mom inherits an old, crumbling mansion, Seda's almost excited to spend the summer there. The grounds are beautiful and it's fun to explore the sprawling house with its creepy rooms and secret passages. Except now her mom wants to renovate, rather than sell the estate—which means they're not going back to the city...or Seda's friends and school. As the days grow shorter, Seda is filled with dread. They're about to be cut off from the outside world, and she's not sure she can handle the solitude or the darkness it brings out in her. Then a

group of teens get stranded near the mansion during a blizzard. Seda has no choice but to offer them shelter, even though she knows danger lurks in the dilapidated mansion—and in herself. And as the snow continues to fall, what Seda fears most is about to become her reality...

This book offers insights into important trends and future scenarios in the global tourism and travel industry. Besides the general topics (aviation and hospitality industry, destination management, marketing, and distribution management) it analyses current challenges and impacts resulting especially from developments in social media, corporate social responsibility and eco-mobility. Sustainability in the global tourism sector and particularly eco-mobility is one of the top themes to-be and therefore a focus of this book. Among the contributors to the book are well-known notabilities from institutions such as the UNWTO and top executives of various segments of the tourism and travel industry. The articles are based on presentations and panel discussions presented at the world's largest tourism

convention, the ITB Berlin Convention.

The Firmware Handbook Springer
Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present,

who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

Kawasaki Vulcan Classic, Classic LT & Custom 2006 - 2019 Handbook of Diesel Engines

The car industry and the way in which cars are created have changed beyond all recognition over the last half-century. Automotive styling was once the grudging afterthought when the engineers had finished their work. Now, following a short flirtation with exotic Italian design houses, it has evolved into sophisticated design carried out by multitalented in-house teams honing carefully crafted brand identities. One of the visionary designers at the forefront of that revolution has been Patrick le Qu é ment. Most widely acclaimed for his 22 years in charge of Renault Design, resulting in such standout models as the Twingo, Sc é nic and Avantime, le Qu é ment has enjoyed a 50-year career that has also taken in Simca, Ford and Volkswagen-Audi. In his foreword to the book, Stephen Bayley calls le Qu é ment 'perhaps the very most original designer working in the conservative car business at the turn of the millennium'. Some 60 million cars across the world now bear the unmistakable stamp of le Qu é ment. Design: Between the Lines is not a straightforward autobiography; rather, le Qu é ment charts his journey through five decades of thoughts, actions, failures and successes. He offers fascinating

commentaries on design and the creative process, and on some of the extraordinary automotive brands that make up our shared cultural heritage. As Bayley notes, for *le Qu'é ment*, design is 'as much a matter of thinking as a matter of drawing'. On a broader, more philosophical level, *le Qu'é ment* also shares his views about life in general and that remarkable contraption called 'the automobile', which has so influenced the lives of millions of people the world over from the late 1800s to the present day. Presented as a series of 50 brief essays or 'perspectives', *le Qu'é ment*'s thoughtful and astute observations from the street, from the design studio and from his seat in the boardroom give the reader a penetrating and often amusing insight into the high-level workings of a global industry, its triumphs and tragedies, and the foibles of the decision-makers responsible for running it. A lively complementary text by the automotive journalist St é phane Geffray accompanies each of *le Qu'é ment*'s perspectives, and illustrations are provided by the automobile designer Gernot Bracht. *Design: Between the Lines* will appeal to all motoring fans and enthusiasts of good design. As Chris Bangle,

the former Director of BMW Design, remarks: 'Few car designers have had a career so filled with innovative successes that they have inspired a whole industry; fewer still have the skills to share it. Engaging and revealing, Patrick relates his personal experience and deep knowledge of car design in a very enjoyable manner.'

Poggio Civitate in Murlo, Tuscany, is home to one of the best-preserved Etruscan communities of the eighth through the sixth centuries BCE. In this book, Anthony Tuck, the director of excavations, provides a broad synthesis of decades of data from the site. The results of many years of excavation at Poggio Civitate tell a story of growth, urbanization, ancient industrialization, and dissolution. The site preserves traces of aristocratic domestic buildings, including some of the most evocative and enigmatic architectural sculpture in the region, along with remnants of non-elite domestic spaces, enabling illuminating comparisons across social strata. The settlement also features evidence of large-scale production systems, including tools and other objects that reflect the daily experiences of laborers. Finally, the site contains the story of its own destruction. Tuck finds in the data clear indications that

Poggio Civitate was methodically dismantled, and he posits hypotheses concerning the circumstances around this violent social and political act.
