Beth Ryder knows she's different. In a tiny rural town, being an orphaned and perpetually single amateur photographer crippled by panic disorder is pretty much guaranteed to make you stick out like a sore thumb. But Beth doesn't understand just how different she really is. One day, strange things

start cropping up in her photos. Things that don't look human. Impossible things. Monstrosities. Beth thinks her hateful sister-in-law, Justine, has tampered with her pictures to play a cruel joke, but rather than admitting or denying it, Justine up and vanishes, leaving the family in disarray. Beth's search for Justine plunges her into a world she never knew existed, one filled with ancient and terrifying creatures. Both enemies and allies await her there—a disturbingly sexy boss, a sentient wolf with diamond fur, body-snatching dinosaur-birds. Separating the allies from the enemies is no easy chore, but in this strange new world, allies are a necessity. A plot is afoot, and Beth—whose abilities no one seems able to explain—may well hold the key to solving it. Nolander is the first novel in the fantasy series Emanations. The second novel, Solatium, and a short story, "Theriac," are also available. The Emanations Series Of all the beings that have lived on Earth, what if just a few had the power to make new realities, according to their desires? What would they create? The Second Emanation: a shadow world where ancient creatures persist, where humanity's dominance is far less certain, where wonder competes with horror. A world like an autumn forest, its realities as multiple and layered as fallen leaves. The world that gives us our gods. In Becca Mills's Emanations series, this strange and magical world crosses paths with a seemingly ordinary young woman from the American Midwest. It'll never be the same again. Reviews "This is among the best of the urban fantasy genre, and it is a wonder why a major publisher has yet to pick it up. Mills has given us such a dynamic world with vibrant characters and multiple plot lines that really bring it all to life." - Twisting the Lens "I simply loved Nolander. I'm going to put it out there and say that this is one of the best debut fantasy books I've read this year! It was that fantastic." - scifiners.us "Nolander was a highly entertaining read. Each time I thought I had a handle on what was going on and what was going to come next the plot would take a turn to something completely unexpected. Becca Mills has created a very vibrant world full of unique creatures and happenings where just about anything you can imagine is possible." - The Dragon's Inkpot Series keywords: fantasy, urban fantasy, contemporary fantasy, fantasy series, speculative fiction, hard fantasy, dark fantasy, paranormal, female protagonist, female main character, science fantasy, action, adventure, monsters, deities, gods, demons, dragons, dying earth, action, fantasy action, magic, alternative history, parallel world, free, freebie

Nigel Calder, a diesel mechanic for more than 25 years, is also a boatbuilder, cabinetmaker, and machinist. He and his wife built their own cruising sailboat, Nada, a project they completed in 1984. Calder is author of numerous articles for *Yachting Monthly* and many other magazines worldwide, as well as the bestselling *Boatowner's Practical and Technical Cruising Manual* and *Boatowner's Mechanical and Electrical Manual*, both published by Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively illustrated guide will enable the reader to be their own diesel mechanic. As Nigel Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the knowledge to spot early warning signs of impending trouble, and to have the ability to correct small ones before they become large ones.'

Diagnostics, or fault finding, is a fundamental part of an automotive technician's work, and as automotive systems become increasingly complex there is a greater need for good diagnostic skills. *Advanced Automotive Fault Diagnosis* is the only book to treat automotive diagnostics as a science rather than a check-list procedure. Each chapter includes basic principles and examples of a vehicle system followed by the appropriate diagnostic techniques, complete with useful diagrams, flow charts, case studies and self-assessment questions. The book will help new students develop diagnostic skills and help experienced technicians improve even further. This new

edition is fully updated to the latest technological developments. Two new chapters have been added – On-board diagnostics and Oscilloscope diagnostics – and the coverage has been matched to the latest curricula of motor vehicle qualifications, including: IMI and C&G Technical Certificates and NVQs; Level 4 diagnostic units; BTEC National and Higher National qualifications from Edexcel; International Motor Vehicle qualifications such as C&G 3905; and ASE certification in the USA.
