My Peugeot 207 with the 1.6 VTI (EP6 5FW) engine had thrown 2 codes that relate to the replacement of the dreaded timing chain which in this case at 110,000km has decided to go out on me. The codes were P11a8 and P11a3. There is a video on youtube with these codes set and that confirms that a timing chain needs to be replaced.

EP6 THP

Refit the timing chain guides bolts (left) and fit the dummy timing chain tensioner supplied within the EP6 engine tool kit (right). Tighten the chain by turning the dummy tensioner screw by hand until you notice the chain is tight. Do not use the timing chain tensioner at this stage, only the dummy tensioner and do not over-tighten the latter.
