My Peugeot 207 with the 1.6 VTI (EP6 5FW) engine had thrown 2 codes that relate to the replacement of the dreaded timing chain which in this case at 110,000km has decided to go out on me. The codes were P11a8 and P11a3. There is a video on youtube with these codes set and that confirms that a timing chain needs to be replaced.

The 1.6-litre naturally aspirated and turbocharged 'Prince' petrol engines were jointly developed by PSA Peugeot Citroen and BMW. Prince engines produced prior to November 2011, however, have a history of problems with the timing chain tensioner – which is responsible for maintaining tension in the timing chain – and there are four different chain tensioner designs.

The normal timing chain length must be up to 73 mm on EP6 engine and 71 mm on EP6DT Turbo engine. It is much better to replace timing chain on Peugeot 308 with EP6 engine when a car is lifted. If there is no lifting-jack hoist, then the car should be put on jack stands, so that you could unbolt the right engine mounting support and set the flywheel timing mark

which is in the bottom of the engine.

Refit the timing chain guides bolts (left) and fit the dummy timing chain tensioner supplied within the EP6 engine tool kit (right). Tighten the chain by turning the dummy tensioner screw by hand until you notice the chain is tight. Do not use the timing chain tensioner at this stage, only the dummy tensioner and do not over-tighten the latter.

Peugeot 207 and Mini timing(1)

Prince is the codename for a family of automobile straight-4 engines developed by PSA Peugeot Citro ë n and BMW. It is a compact engine family of 1.4 – 1.6 L in displacement and includes most modern features including gasoline direct injection, turbocharging, BMW VANOS and variable valve timing..
