When Christianity spread from its Mediterranean base into the Germanic and Celtic north, it initiated profound changes, particularly in kinship relations and sexual mores. Joseph H. Lynch traces the introduction and assimilation of the concept of spiritual kinship into Anglo-Saxon England. Covering the years 597 to 1066, he shows how this notion unsettled and in time altered the structures of the society. In early Germanic societies, kinship was a major

organizing principle. Spiritual kinship of various kinds began to take hold among the Anglo-Saxons with the arrival of Christian missionaries from Rome in the seventh century. Lynch discusses in detail sponsorship at baptism, confirmation, and other rituals in which an individual other than a biological parent presented someone, often an infant, for initiation into Christianity. After the ceremony, the sponsor was regarded as the child's spiritual parent or godparent, whose role complemented that of the natural mother and father, with whom the sponsor had become a "coparent." He describes the difficulties posed by the incest taboo, which included a ban on marriage between spiritual kin. Lynch's work reveals how Anglo-Saxons, though never accepting the sexual taboos that were so prominent in the Frankish, Roman, and Byzantine churches, did create new forms of spiritual kinship. Unusual in its focus and scope, this book illuminates an integral element in the religious, social, and diplomatic life of Anglo-Saxon England. It also contributes to our understanding of the ways in which Christianization reshaped societal relations and moral attitudes.

Excerpt from The Armed Forces Officer: "In 1950, the great Soldier-Statesman George C. Marshall, then serving as the Secretary of Defense, signed a cover page for a new book titled The Armed Forces Officer. That original version of this book was written by none other than S.L.A. Marshall, who later explained that Secretary Marshall had 'inspired the undertaking due to his personal conviction that American military officers, of whatever service, should share common ground ethically and morally.' Written at the dawn of the nuclear age and the emergence of the Cold War, it addressed an officer corps tasked with developing a strategy of nuclear deterrence, facing unprecedented deployments, and adapting to the creation of the Department of Defense and other new organizations necessary to manage the threats of a new global order. Now, in the second decade of the 21st century, our nation is again confronted with a volatile and complex security environment, and addressing the challenges of our time will place new demands on military leaders at all levels. We in the Profession of Arms will continue to adapt our training and education programs, as we have always done, to provide our officers with the intellectual and practical tools necessary to succeed in this unpredictable and unstable world. The character of warfare may change over time, but its nature does not. As novel as much of the current security environment may seem, George C. Marshall's wisdom still rings true today. Regardless of the challenges we face, our leaders, especially our officers, must share a moral foundation and practice a common professional ethic. Our tactics, techniques, and practices may change, but our bedrock principles remain the same. This new edition of The Armed Forces Officer articulates the ethical and moral underpinnings at the core of our profession. The special trust and confidence placed in us by the Nation we protect is built upon this foundation. I commend members of our officer corps to embrace the principles of this important book and practice them daily in the performance of your duties. More importantly, I expect you to imbue these values in the next generation of leaders." --Joseph F. The original Fiero was no ball of fire with the Iron Duke 4-cylinder engine; enthusiasts had to wait for the V6 for any real performance. The style and configuration was inspired by the Fiat X/19. The Fiero pioneered new production technology in the form of a steel space frame clothed with bolt-on plastic panels. Quality control was inconsistent with some customers

feeling as if they were doing on the road development for the company.

Production was stopped after just five years, just as it was just getting into its stride.
