Corresponding to Lilley's Pharmacology and the Nursing Process, 6th Edition, Pharmacology Online features a collection of self-paced learning modules that will enhance understanding of pharmacology. Master the basic principles of pharmacology, and more! Interactive Learning Activities and true-to-life Case Studies will facilitate understanding of how drugs work and how to administer them safely in the clinical setting. Case Studies show the consequences of both correct and incorrect choices, and provide rationales for incorrect choices. Case Study Quizzes test understanding of key content and principles covered in the Case Studies. Interactive Learning Activities provide need-to-know review of critical drug content in a fun, game-like way. Practice Quizzes for the NCLEX Examination provide practice in answering NCLEX Examination-style questions to promote success with the expanded pharmacology content of the NCLEX Examination. Roadside Assistance Video Clips use humor and analogy to bring difficult content to life Flashcard sets provide an easy-to-use, engaging way to memorize information about major drugs, drug classes, and pharmacologic principles. Care Planning Activities present brief case studies along with a care plan template for completion. Animations bring difficult concepts to life! An Audio Glossary presents both a definition and an audio pronunciation for more than 1,400 terms and drug names. A Drug Handbook serves as a convenient quick reference within the course. New organization to match the textbook helps emphasize the relevance of each Self-Study Module, video, animation, and more to understanding and learning key concepts from the text. Five brand-new, drug-specific Self-Study Modules go beyond the basic principles of pharmacology to focus on important drug content areas: Pain Antihypertensives Medications for Asthma Medications for Peptic Ulcer Disease with H. pylori Antilipemic Drugs

Covering the ratio and proportion and formula methods, this comprehensive textbook presents a straightforward, real-world approach to the mathematical calculations used in the clinical setting. It features a unique, step-by-step process that teaches you to identify the information needed to perform a calculation, determine if information is missing, set up and perform the calculation, and check the answer to ensure accuracy. This systematic approach is designed to reduce human calculation errors and ensure patient safety. Common medications and methods of administration are used throughout the textbook, with more than 1,200 practice problems to help you master the math needed for clinical practice. All content, examples, problems, and scenarios are clinically based and completely up to date. More than 500 full-color illustrations show drug labels, parenteral and oral syringes, medicine cups, pumps, IV equipment, and more that are used in current clinical practice. Promotes learning with more than 1,200 practice problems and comprehensive math review problems. Safety Alert, Clinical Alert, and Human Error Alert boxes are incorporated throughout to promote safe practice. Clinical Connections begin each chapter and explain how that topic relates to clinical practice. Examples for each new topic are presented in a unique, step-by-step format: the prescription, what you HAVE, what you KNOW, what you WANT, critical thinking, answer for best care, human error check boxes, and does your answer fit the general guideline? Practice problems follow each set of examples to reinforce your understanding. Follows current TJC and ISMP safety recommendations. Answer key is new to this edition and provides immediate feedback for practice problems. Features the latest drug information in practice problems and photographs. Drug Calculations Student Companion, Version 4 will be available on Evolve. It offers practice and application with an interactive tutorial on various topic areas within drug calculations and features over an additional 600 practice problems.
