American Journal of Hospital Pharmacy ASHP
The first edition of Pharmacy Practice Research Methods provided a contemporary overview of pharmacy practice research, discussing relevant theories, methodologies, models and techniques. It included chapters on a range of quantitative, qualitative, action research and mixed methods as well as management theories underpinning change in pharmacy practice. This new edition of the book is much broader and more diversified. It includes the quality improvement methods in pharmacy practice research, focusing on the key differences between high and low-income countries with regard to pharmacy practice research, as well as the main challenges faced when conducting such research – areas of significant global interest. In addition, a number of the chapters covering fast-moving fields where new methods have been developed and published have been updated. Featuring seven new topics and presenting future trends, the book also explains in detail methods used in covert and overt observations in pharmacy practice, as well as methods involved in realist research, which are important to countries seeking to produce evidence-based information in this area.

Pharmacotherapy Handbook, 9/E ASHP

This innovative text equips pharmacists and pharmacy students with the skills to assist patients in managing existing conditions and controlling the development of preventable disorders. The text demonstrates how important lifestyle modification strategies—including nutrition, physical activity, weight control, and smoking cessation—can be used in a pharmacy setting to improve patients' well-being. Case studies show how lifestyle modifications can positively impact patients with chronic diseases. Chapters explain how lifestyle modification strategies might be different for children, adolescents, older adults, women, and minorities. The book includes detailed instructions for writing wellness plans for patients who have, or are at risk for, certain chronic diseases.

Pharmacotherapy Handbook, Eighth Edition McGraw Hill Professional

A growing practice area, Pediatric Pharmacotherapy will become a Board Certified Specialty in 2015. Yet, with little clinical data on the efficacy of drugs used for children and their other special

needs, these small patients can be your biggest challenge. Now there is a very effective way to assess and advance your pediatric pharmacotherapy skills, on your own time, at your own pace: ASHP's new Pediatric Pharmacotherapy Self Assessment. Sandra Benavides and Milap C. Nahata, co-lead editors of a major pediatric pharmacotherapy textbook, and Hanna Phan, Assistant Professor of Pharmacy Practice & Science and Pediatrics at The University of Arizona, Colleges of Pharmacy and Medicine, have created this unique resource. A practical learning tool for all levels of proficiency, it allows students, residents, and practicing pharmacists alike to strengthen their knowledge and analytical skills through 32 cases involving varying degrees of diagnostic complexity. Based on real life situations, these cases present challenges in the use of supplements, OTC, drug formulations, and all other therapies for neonates, children, and adolescents. This Self Assessment is a professional development tool for all areas of concern and levels of practice that can benefit you and your youngest patients for years to come.

A Magnificent Text Book Of Pharmacovigilance Springer Science & Business Media

While the pharmaceutical industry evolves, the need for curriculum changes inherently follows suit. As healthcare systems have continuously improved through the use of big data and innovative care approaches, practicing pharmacists have also had to adjust and expand their roles. As such, it is imperative that the current and future pharmaceutical workforce is properly trained, taking into account new competencies that are needed to provide exceptional multidisciplinary patient healthcare. *Pedagogies for Pharmacy Curricula* presents emerging teaching practices and methods for pharmacy curricula and reviews pedagogic methodologies on the scope of pharmaceutical care in pharmacy curricula. The chapters present learning outcomes on general and specific topics, impact of undergraduate interventions on patient outcomes, and comparisons between different teaching pedagogies/models. While highlighting topic areas such as perspectives on learning and teaching, evidence-based practice education, and the relationships between academia and professionals, this book is ideal for health professionals, pharmacists, teachers, schools of pharmacy, medical school faculty, international

organizations, clinicians, practitioners, researchers, academicians, and students who are interested in learning about the latest pedagogic methodologies in pharmacy curricula.

An official publication of the Society for Vascular Nursing, the Second Edition of the Core Curriculum for Vascular Nursing provides the core knowledge needed by the novice entering the specialty. It also serves as a manual for the nursing instructor, a study guide for cardiovascular certification, and a reference for the experienced vascular clinician caring for the challenging vascular patient. Topics include the evolution of vascular nursing, vascular assessment and diagnosis, vascular nursing research, and guideline-directed medical, endovascular and surgical therapy for the treatment of carotid artery stenosis, aortic aneurysm, renal artery stenosis, vascular access, venous disease, vascular trauma, amputations, and lymphedema.

Drug-Induced Diseases Cambridge University Press

Dr Stahl's books occupy a central position as core educational resources in the psychopharmacology literature. Building on Dr Stahl's exceptional ability to communicate complex principles and make them easily understandable, this book offers 150 self-assessment questions derived from the Neuroscience Education Institute's Master Psychopharmacology Program. The self-assessment questions will help the reader to identify areas of competence or the need for further study and offers CME credit. In addition, the questions themselves are learning exercises: each question is followed by a thorough explanation of the correct and incorrect answer choices. Readers can work through the questions to prepare for formal tests, including American Board of Psychiatry and Neurology examinations and to achieve MoC credits towards ongoing ABPN re-accreditation. The questions are also ideal training tools for those working in related clinical fields and in industry.

PSAP, Pharmacotherapy Self-assessment Program: Neurology, Psychiatry McGraw Hill Professional Cardiovascular disease is the leading cause of death in women in the US, with more women dying from heart disease than men. Women may have different presentation from men and often need a different approach to diagnosis and treatment. There are also unique topics of management of heart disease in women, including issues during pregnancy, lactation, and menopause. Many different health care providers, as well as cardiologists are involved in treating these patients. A manual reviewing diagnosis and treatment of cardiac disease in women would help providers without specific cardiology training to deliver care with greater efficiency. A practical and comprehensive guide geared towards these providers would be a highly practical and valuable resource that would be utilized in everyday practice in offices that include urban clinics, general medicine offices, obstetrics and gynecology offices, as well as in the surgical subspecialties. This book will be a highly practical resource that can be directly applied to the issues that arise in everyday practice. There is no available book on the market that focuses on a broader approach to cardiac disease in women or focuses on non-cardiology providers (and their trainees) who have the need to know more about treatment of cardiovascular disease in women.?
