Engineering News and American Contract Journal World Bank Publications

This publication of School Environment in Africa and Asia Pacific is a continuation of our maiden and second publications, School Environment in Nigeria and the Philippines, published in February 2015, and School Environment in Nigeria, Ghana, and the Philippines, published in March 2017. The philosophy being that since there is a shift from globalization to internationalization and to cross-border education, there is the urgent need to revisit some topical issues in our school environment toward the realization of an internationalized, qualitative, and cross-border teaching and learning, using information and communication technology. It is therefore, based on this, that the Dakar framework for action (UNESCO, 2000) stipulates the use of ICT as one of the major strategies to attain education-for-all (EFA) goals.

Occupational Outlook Handbook National Academies Press

This book reconstructs Deleuze and Guattari's micropolitics toward a philosophy of 'becoming-revolutionary'. It provides novel ways to comprehend their political philosophy, through a critical engagement with Chantal Mouffe's theorization of radical democracy, Michael Hardt and Negri's diagnosis of Empire, Franco Berardi's analysis of semicapitalism, the Philippine Party-List System Act, and the ASEAN Integration Project, to name a few. These initiatives aim to examine, expand, and challenge Deleuzo-Guattarian philosophy against the backdrop of various present-day predicaments and practices that perpetually allow people to choose their own oppression. Furthermore, the book embarks on an invigorating journey through philosophy, politics, cultural studies, and contemporary events, searching for new modes of thinking and resistance that carry with them the radical potentials of a revolution-to-come. Through the philosophy of becoming-revolutionary, the book endorses the cultivation of new concepts, subjectivities, and relations, capable of subverting advanced capitalism and other kinds of ethical fascism toward a people- and world-to-come. Deleuze and Guattari's Philosophy of 'Becoming-Revolutionary' The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.

Annotated Bibliography of Mindanao Studies: Education, science and technology, information technology, engineering and food technology (ST) Jimmy Santos, PI, retired, decorated, LAPD detective and LT Mark Brenner, serving LAPD detective team up to pursue a modern day Aztec Shaman's bloody killing and sacrificing spree across Los Angeles of Vietnamese people and a white racist radio talk show host. Simultaneously Jimmy responds to Sony Studio's request to stymie a corrupt community organizer's blackmail attempt to disrupt their production of Seascape. He meets the director, Alison Reed. A love affair ignites between these two complicated, confident, driven and ambitious people. The investigation becomes personal when the killer targets Jimmy and Alison.

Level of Competence of Civil Engineers in the Philippines Prepare for your Professional Engineering exam with this new edition of SME's Study Guide for the Professional Licensure of Mining and Mineral Processing Engineers. This handy workbook lets you know what to expect and provides an opportunity to practice your test-taking skills. The text covers the history of professional licensure and the Mining and Minerals Processing exam, explains what licensing can do for you, outlines the engineering licensure process, highlights the six steps to licensure, covers the application process, includes the National Council of Examiners for Engineering and Surveying Model Rules of Professional Conduct and NEEES publications, and describes the testing process. Perhaps the most useful element is a sample test, complete with questions and answers, that is similar in content and format to an actual principles and practice (PE) licensure exam.

Doctoral Thesis / Dissertation from the year 2007 in the subject Pedagogy - Job Education, Occupational Training, Further Education, grade: 1.00, University of the Philippines (Graduate School), course: Educational Management, language: English, abstract: The study focused on the assessment of the level of competence of Filipino civil engineers in Northern Samar, its prospects for employment and implications for curricular improvement. It employed the descriptive-correlational method of research. Two sets of questionnaire were utilized to gather information needed in this study. The first was on the profile of the civil-engineer respondents and level of competence and the second was the AACCUP instrument. The civil engineers rated themselves as moderately competent as to level of competence, ranking as first is managerial skills while keeping abreast with the latest technology was observed to be the lowest. The respondents' immediate supervisors or HRMO rated their employees as moderately competent, wherein technical expertise is the highest and communication skills was observed to be the lowest. As regards to the status of the civil engineering curriculum in the University of Eastern Philippines, Vision, Mission, Goals and Objectives, Faculty, Curriculum and Instruction, Support to Students, Library and Administration were rated very good, while Physical Plant and Facilities, Extension & Community Involvement and Laboratories were rated good and research was rated fair. In summary, the general findings of the study had a very good rating. The same findings revealed that there is no significant relationship between the respondents' level of competence and their age, eligibility, position and years of experience, while sex, category of employment, type of employment, training/seminars attended and highest educational attainment were found to be significant with the respondents' level of competence. There is no

significant difference on the level of competence between the UEP and the non UEP graduates in terms of communication skills, managerial skills, environmental awareness, professional advancement and keeping abreast with the latest technology, while there is significant difference on the level of competence between the UEP and non UEP graduates in terms of skills and technical expertise. Likewise there is no significant difference on the ratings of the civil engineers and the observations of their immediate supervisors or HRMO.

Focal Point

During the 2016 presidential election, America's election infrastructure was targeted by actors sponsored by the Russian government. Securing the Vote: Protecting American Democracy examines the challenges arising out of the 2016 federal election, assesses current technology and standards for voting, and recommends steps that the federal government, state and local governments, election administrators, and vendors of voting technology should take to improve the security of election infrastructure. In doing so, the report provides a vision of voting that is more secure, accessible, reliable, and verifiable.

Popular Science

The polygraph, often portrayed as a magic mind-reading machine, is still controversial among experts, who continue heated debates about its validity as a lie-detecting device. As the nation takes a fresh look at ways to enhance its security, can the polygraph be considered a useful tool? The Polygraph and Lie Detection puts the polygraph itself to the test, reviewing and analyzing data about its use in criminal investigation, employment screening, and counter-intelligence. The book looks at: The theory of how the polygraph works and evidence about how deceptiveness affects and other psychological conditions affect the physiological responses that the polygraph measures. Empirical evidence on the performance of the polygraph and the success of subjects' countermeasures. The actual use of the polygraph in the arena of national security, including its role in deterring threats to security. The book addresses the difficulties of measuring polygraph accuracy, the usefulness of the technique for aiding interrogation and for deterrence, and includes potential alternatives such as voice-stress analysis and brain measurement techniques.

Engineering and Contracting

This report reviews engineering's importance to human, economic, social and cultural development and in addressing the UN Millennium Development Goals. Engineering tends to be viewed as a national issue, but engineering knowledge, companies, conferences and journals, all demonstrate that it is as international as science. The report reviews the role of engineering in development, and covers issues including poverty reduction, sustainable development, climate change mitigation and adaptation. It presents the various fields of engineering around the world and is intended to identify issues and challenges facing engineering, promote better understanding of engineering and its role, and highlight ways of making engineering more attractive to young people, especially women.--Publisher's description.
