Peterson's Peterson's
Master the Police Officer Exam prepares readers for the written exam, educates them on the physical skills they need, and gives them valuable tips to succeed during their interview and psychological screening. They will find an overview of the duties of police officers and the qualifications required. Test takers can prepare with five practice

tests and comprehensive review material covering the three types of questions that appear on the written police examination: practice judgment, reading-based, and observation and memory. The guide also includes indispensable appendixes that give a comprehensive outline of what to expect once trainees are accepted into the police academy, along with a sample physical fitness course.
Peterson's

Master the Police Officer Exam helps readers navigate the police application and screening process.

Springer Science & Business Media
This volume collects the papers accepted for presentation atMIRAGE 2009. TheMIRAGE conference is continuing to receive international recognition, with this year's presentations coming from 25 countries despite the large wor-

wide financial crisis. This time Asia submitted far fewer papers than previously and fewer than Europe. France proved to be the most active scientifically with a total of 16 submitted papers. Germany came second (10 submitted papers) and China third (8 papers). We received a total of 83 submissions and accepted 41 oral presentations, over the three-day event. All papers were reviewed by three to four members of the Program Committee. We believe that

on was made by the conference chairs. At this point, we wish to thank the Program Committee and additional referees for their timely and high-quality reviews. We also thank the invited speakers Luc Van Gool, Frank Multon and Raquel Urtasun for kindly accepting to present very interesting talks. mirage 2009 was organized by inria and Ghent University.

*Searchable CD

ROM containing the entire book (including images) *Over 450 color images, plus never before published images provided by the George Eastman House collection, as well as images from Ansel Adams, Howard Schatz, and Jerry Uelsmann to name just a few The role and value of the picture cannot be matched for accuracy or impact. This comprehensive treatise, featuring the history and historical

processes of photography, contemporary applications, and the new and evolving digital technologies, will provide the most accurate technical synopsis of the current, as well as early worlds of photography ever compiled. This Encyclopedia, produced by a team of world renown practicing experts, shares in highly detailed descriptions, the core concepts and facts relative to anything photographic.

This Fourth edition of the Focal Encyclopedia serves as the definitive reference for students and practitioners of photography worldwide, expanding on the award winning 3rd edition. In addition to Michael Peres (Editor in Chief), the editors are: Franziska Frey (Digital Photography), J. Tomas Lopez (Contemporary Issues), David Malin (Photography in Science), Mark Osterman

(Process Historian), Grant Romer (History and the Evolution of Photography), Nancy M. Stuart (Major Themes and Photographers of the 20th Century), and Scott Williams (Photographic Materials and Process Essentials) Pacific Islands Monthly Techniques of black-and-white photography for publication, particularly in yearbooks. Includes discussion of darkroom design and management. Students Get the
