turmoil that was reflective of the mood of the country, but it was also a symptom of trouble in the artist's life, the beginnings of a mental breakdown that Springsteen would only talk about openly decades after the album's release. Warren Zanes spoke to many people involved with making Nebraska, including Bruce

Springsteen himself. He also interviewed more than a dozen celebrated artists and musical insiders, from Rosanne Cash to Steven Van Zandt, about their reactions to the album. Zanes interweaves these conversations with inquiries into the myriad cultural touchpoints, including Terrence Malick's

Badlands and the short stories of Flannery O'Conner, that influenced Springsteen as he was writing the album's haunting songs. The result is a textured and revelatory account of not only a crucial moment in the career of an icon but also a record that upended all expectations and predicted a home-recording revolution. In recent decades, the importance of sound for remembering the past and for creating a sense of belonging has been increasingly acknowledged. We keep "sound souvenirs" such as cassette tapes and long play albums in our attics because we want to be able to recreate the music and everyday sounds we once cherished. Artists and ordinary listeners deploy the newest digital audio technologies to recycle past sounds into present tunes. Sound and memory are inextricably intertwined, not just

through the commercially exploited nostalgia on oldies radio stations, but through the exchange of valued songs by means of pristine recordings and cultural practices such as collecting, archiving and listing. This book explores several types of cultural practices involving the remembrance and restoration of past sounds. At the same time, it theorizes the cultural meaning of collecting, recycling, reciting, and remembering sound and music. Lean CX Walter de Gruyter GmbH & Co KG

Music and Technology in the Twentieth Century

Nordic Council of Ministers Media of the Masses investigates the

social life of an everyday technology—the cassette tape—to offer a multisensory history of modern Egypt. Over the 1970s and 1980s, cassettes became a ubiquitous presence in Egyptian homes and stores. Audiocassette technology gave an opening to ordinary individuals, from singers to smugglers, to challenge state-controlled Egyptian media. Enabling an unprecedented number of people to participate in

---

the creation of culture and circulation of content, cassette players and tapes soon informed broader cultural, political, and economic developments and defined "modern" Egyptian households. Drawing on a wide array of audio, visual, and textual sources that exist outside the Egyptian National Archives, Andrew Simon provides a new entry point into understanding everyday life and culture. Cassettes and cassette players, he demonstrates, did

not simply join other twentieth century mass media, like records and radio; they were the media of the masses. Comprised of little more than magnetic reels in plastic cases, cassettes empowered cultural consumers to become cultural producers long before the advent of the Internet. Positioned at the productive crossroads of social history, cultural anthropology, and media and sound studies, *Media of the Masses* ultimately shows how the most

ordinary things may yield the most surprising insights.
