This book offers wide-ranging insights into the organising capacities of workers in Asia today. Nine case-studies examine workers' responses to class relations through independent unions, non-government organisations (NGOs) and more (dis)organised struggles.

Countering the notion that globalisation holds entirely negative consequences for labour organisation, the authors reveal some of the openings for local activism which can arise from transnational production arrangements. The volume covers the "second-tier" industrializers - China, Thailand, Malaysia, the Philippines, Indonesia, India and Bangladesh.

Interdisciplinary in nature, it will be of great interest to students and scholars of Asian studies, development studies and international labour studies.

This is the first book to be published by a patient about the journey out of the black

hole of depression thanks to the remarkable medical breakthrough procedure of vagus nerve stimulation. Out of the Black Hole is written by a patient for patients with easy-to-understand explanations which demystify this simple, safe procedure and helps patients make an informed decision about the surgery. Vagus Nerve Stimulation is not related to brain surgery or ECT. There are not cognitive impairments (i.e. memory loss) or drug interactions. Included is information about the potential side effects, benefits, insurance reimbursement codes and reimbursement process. Vagus nerve stimulation has been FDA approved for epilepsy since 1997 and on June 15th, 2004 and FDA Advisory Panel recommended approval of vagus nerve stimulation for chronic depression. Over 30,000 patients have safely been implanted with the device for epilepsy. The procedure is generally done on an out-patient basis. This is considered one of the major breakthroughs in medical device history which could potentially help the 4.5 million Americans who suffer from the debilitating illness of chronic depression.

A totally revised and updated edition of the first book to offer a holistic approach to slowing the progression of MS • Provides guidance on special diets and nutritional supplements, exercise, alternative therapies, and the effects of negative and positive thoughts on MS • Explains how to reduce toxic overload from mercury and chemicals • Includes life wisdom and coping strategies from others who suffer with MS Judy Graham is an inspiration. Diagnosed with multiple sclerosis when she was just 26 years old, 35 years later Judy Graham is still walking, working, and has successfully birthed and raised a son who is now an adult. In this totally revised and updated edition of her groundbreaking Multiple Sclerosis, first published in 1984, she shares the natural treatments that have helped her and many others with MS stabilize or even reverse the condition. Beginning with the effects of diet, she explains that many people with MS have been eating the wrong foods and shows

which foods are " good " and " bad, " how to recognize food sensitivities, and how to correct nutritional deficiencies using dietary supplements. She also looks at reducing the body ' s toxic overload, whether from mercury amalgam fillings, chemicals, or medications. She presents the exercises with proven benefits for MS she has found most reliable and appropriate, such as yoga, pilates, and t ' ai chi, and explores alternative therapies that provide relief and support to the body ' s efforts to control MS, including acupuncture, reflexology, shiatsu, reiki, and ayurveda. Most important are the insights she provides on the effects of negative thoughts on MS. She demonstrates how a positive mental attitude can actually slow down or even reverse the progression of this disease. Judy Graham is living proof that, as devastating as a diagnosis of MS is, life can still be lived to its fullest.
