Brief patient case studies list important assessment data and pose a critical thinking question to readers. Critical Care Concepts are presented in short questions to engage readers in applying knowledge to difficult concepts. Clinical scenarios cover patient presentation, assessment data, and treatment options to acquaint readers with different clinical situations. NBRC exam-style assessment questions at the end of each chapter offer practice for the certification exam. Key Point boxes highlight need-to-know information. Logical chapter sequence builds on previously learned concepts and information. Bulleted end-of-chapter

summaries help readers to review and assess their comprehension. Excerpts of Clinical Practice Guidelines developed by the AARC (American Association for Respiratory Care) make it easy to access important information regarding indications/ contraindications, hazards and complications, assessment of need, assessment of outcome, and monitoring. Chapter outlines show the big picture of each chapter's content. Glossary of mechanical ventilation terminology includes highlighted key terms in each chapter. NEW! Completely revised chapter on ventilator graphics

offers a more practical explanation of ventilator graphics and what readers need to know when looking at abnormal graphics. NEW! Additional case studies and clinical scenarios cover real-life scenarios that highlight the current trends in pathologies in respiratory care. deliver as intended. The decline in the relationship between television and its commissioned operas is charted through three case studies: Menotti's Amahl and the Night Visitors (NBC), Britten's Owen Wingrave (BBC), and Gerald Barry's The Triumph of Beauty and Deceit (Channel 4) - the first a live broadcast, the second a video recording, and the third a filmed opera made for television."--Jacket. Television Opera This is the first comprehensive

introduction to the concepts, theories, and applications of pricing and revenue optimization. From the initial success of "yield management" in the commercial airline industry down to more recent successes of markdown management and dynamic pricing, the application of mathematical analysis to optimize pricing has become increasingly important across many different industries. But, since pricing and revenue optimization has involved the use of sophisticated mathematical techniques, the topic has remained largely inaccessible to

students and the typical manager. With methods proven in the MBA courses taught by the author at Columbia and Stanford Business Schools, this book presents the basic concepts of pricing and revenue optimization in a form accessible to MBA students, MS students, and advanced undergraduates. In addition, managers will find the practical approach to the issue of pricing and revenue optimization invaluable. Solutions to the end-of-chapter exercises are available to instructors who are using this book in

their courses. For access to the solutions manual, please contact marketing@www.sup.org .
