Schefferus (1621-79) was one of the most important Swedish humanists of his time. He was also known as Angelus and is remembered for writing hymns. Born in Strasbourg, then part of the Holy Roman Empire, he came from a patrician family, studied at university there and briefly in Leiden, and was in 1648 made professor Skytteanus of eloquence and government at Uppsala University, a chair he held until his death. He also spent time on philological and archaeological studies. This work, a comprehensive history of Northern Scandinavia topology, environment

and Sami living conditions, dwelling places, clothing, gender roles, hunting, child raising, shamanism and pagan religion, was first published as Lapponia in 1673, with this English translation appearing the following year.

This compelling novel follows four women as they learn to balance children, estranged husbands, boyfriends, and problems at work through their faith in God.

Michelle, Tonya, Mrs. Judson, and Miz Ida. African-American, white, rich, poor -- they seemingly have nothing in common. Yet every day they face the complex realities of twenty-first-century urban life as they try to balance their needs with their belief in God. Through the course of a year, these women must come to terms with the past, discover their true identities, and recognize the unexpected miracles that reveal God's all-encompassing love. These four women entertain us and invite us to join in their lives. As they

welcome us, they also introduce us to the men in their lives. The men play supporting roles, adding color and zest to the lives of the Cover Girls. Bishop Jakes knows the struggles real women encounter and the losses that make it difficult to face the future. He brings compassionate insight and deep wisdom to this novel and proves that he is not only a gifted preacher, but a born storyteller.

"Protozoa may not be the first things that come to mind when you think of adaptation, evolution, food webs, succession, physiology, life strategies, and chemical susceptibility. These microorganisms, however, are a great tool to model these and other macro-concepts.

Protozoa perform many of the same biological and ecological activities seen in their macroscopic counterparts. And they are much easier to find and cultivate. This book's 28 hands-on activities will help teach organizing principles of biology and ecology, and make links to other disciplines."--Back cover.

Global value chains (GVCs) are evolving in light of technological developments, such as robotics, big data and the Internet of Things. These technologies are reshaping GVCs and effecting changes on labor markets in developed and developing economies and on supply chain management. This report discusses how technological developments are creating new opportunities for the participation of small and medium-sized enterprises in

global value chains and reviews issues related to GVC measurement. The report is a follow-up to the first Global Value Chain Development Report, which revealed the changing nature of international trade when analyzed in terms of value chains and value-added trade. This report is co-published by the World Trade Organization, the Institute of Developing Economies (IDE-JETRO), the Organization for Economic Cooperation and Development, the Research Center of Global Value Chains headquartered at the University of International Business and Economics (RCGVC-UIBE), the World Bank Group, and the China Development Research Foundation.

This is the first translation into English of Ralph of Caen's *Gesta Tancredi*. The text provides an important narrative of the First Crusade and its immediate aftermath, covering the period 1096-1105. The work as a whole has a striking Norman point of view and contains details found in no other source, providing a corrective to the strong northern focus of most of the other narrative sources for the First Crusade.

The *Historia Ierosolimitana*, attributed to Albert of Aachen, is the most complete, detailed and colourful of the contemporary narratives of the First Crusade, and of the careers of the first generation of Latin settlers in Outremer. This English translation, with original Latin text, has been prepared from a critical study of the manuscripts. Generating interest in previously disregarded aspects of crusade and settlement in the first decades of the twelfth century, it is set to alter the focus of crusades studies.

A warm, gorgeous exploration of a little girl's experience

immigrating to a new country and missing her home and her grandmother, who still lives far away. Sakura's dad gets a new job in America, so she and her parents make the move from their home in Japan. When she arrives in the States, most of all she misses her grandmother and the cherry blossom trees, under which she and her grandmother used to play and picnic. She wonders how she'll ever feel at home in this new place, with its unfamiliar language and landscape. One day, she meets her neighbor, a boy named Luke, and begins to feel a little more settled. When her grandmother becomes ill, though, her family takes a trip back to Japan. Sakura is sad when she returns to the States and once again reflects on all she misses. Luke does his best to cheer her up -- and tells her about a surprise he knows she'll love, but she'll have to wait till spring. In the meantime, Sakura and Luke's

friendship blooms and finally, when spring comes, Luke takes her to see the cherry blossom trees flowering right there in her new neighborhood. Sakura's *Cherry Blossoms* captures the beauty of the healing power of friendship through Weston's Japanese poetry-inspired text and Saburi's breathtaking illustrations.

An up-to-date collection of tutorial papers on the latest advances in the deposition and growth of thin films for micro and nano technologies. The emphasis is on fundamental aspects, principles and applications of deposition techniques used for the fabrication of micro and nano devices. The deposition of thin films is described, emphasising the gas phase and surface chemistry and its effects on

the growth rates and properties of films. Gas-phase phenomena, surface chemistry, growth mechanisms and the modelling of deposition processes are thoroughly described and discussed to provide a clear understanding of the growth of thin films and microstructures via thermally activated, laser induced, photon assisted, ion beam assisted, and plasma enhanced vapour deposition processes. A handbook for engineers and scientists and an introduction for students of microelectronics.

Included in the magnificent pages of the *Mira calligraphiae monumenta* are two alphabets. Executed by an unknown hand, the first consists of Roman capital letters; the other is Gothic lower-case letters. As with the calligraphy of Bocskey described

above, these alphabets were embellished by Joris Hoefnagel, a painter at the court of Rudolf II. In embellishing the alphabets, Hoefnagel employed symbols and heraldic objects--masks, animals, plants, obelisks--to convey the power and greatness of the emperor. An Abecedarium contains the thirty-eight pages from the Mira codex that display Hoefnagel's virtuosity in decorating the alphabets. Calligraphers, graphic artists, and all lovers of beautiful books will delight in Hoefnagel's artistry.
