Get ready for moving islands! Mischievous monkeys! And a splashy adventure with illustrations on almost every page. When Oliver 's explorer parents go missing, he sets sail to find them with some new friends. There 's a grumpy albatross, a nearsighted mermaid . . . even a living island! But the high seas are more exciting and strange than Oliver could have imagined. Can he and his crew spar with sarcastic seaweed, outrun an army of sea monkeys, win a fabulous maritime fashion contest, and defeat a wicked sea captain in time to save Mom and Dad? For early chapter book readers who are ready for something longer, the Not-So-Impossible Tales are packed with silly humor, action, and larger-than-life fun. " [A] sly and dashing tale. . . Readers ' ribs aren ' t the only ones that get a vigorous tickle. " —Kirkus Reviews " A delightfully told, beautiful tale of nautical hairdressing, saltwater primates and sarcastic seaweed—this is my kind of book! " —Chris Riddell, award-winning co-creator of the Edge Chronicles From the Hardcover edition.

Issue 3 of the BRC's "Global standard for consumer products" replaces issues 2 and 2a. There are substantial revisions and updates to the content to take into account the increasingly complex and prescriptive safety requirements in the global consumer products market. The standard covers a wide range of non-food products in

the global marketplace, including: formulated products such as shampoos, paints and cosmetics; fabricated items like televisions and toys; electrical goods; furniture and textiles. Content revisions include the re-definition of consumer products into three, more clearly specified Product Groups, depending on the level of potential risk attributable to the product. The Standard also outlines an amended frequency of audits, including an audit visit every year following certification. New content includes the introduction of a grading system, defined by the number and severity of non conformities found. 'Fundamental' clauses have been added for the most important safety issues. Failure to meet a fundamental clause may result in failure to obtain certification or suspension of an existing certificate. The BRC Global Standard for Consumer Products Issue 3 is the first publication to result from the partnership between the BRC and the Retail Industry Leaders Association (RILA) in Washington. RILA promotes consumer choice and economic freedom through public policy and industry operational excellence. Its members include retailers, product manufacturers, and service suppliers - which together provide millions of jobs and operate more than 100,000 stores, manufacturing facilities and distribution centers domestically and abroad.

Henry Jett ' s life is slowly going nowhere. His girlfriend recently left, and his job in a local garage is uninspiring, considering that he doesn ' t particularly like cars. Henry finds solace in his eccentric passion, rebuilding the skeletons of birds and animals. Meanwhile Henry ' s brother, Dan, is disappearing into an obsession of his own. Henry ' s loneliness and passivity is thrown into relief when Dan ' s preoccupation with running farther and faster—as if he could outrun his mortality—casts him out of Henry ' s life entirely. Without Dan to rely on, Henry begins to engage in new ways with the people around him in his Prairie city: the 80-year-old Russian émigré who delights in telling stories; the very pregnant former employee of his mother ' s; the lawyer who may or may not be his brother ' s ex-girlfriend. Gradually they demand that Henry become a participant in his own story and forge his own way of living in the world. In *The Afterlife of Birds*, award-winning poet Elizabeth Philips draws together unforgettable characters who subtly, powerfully demonstrate the beauty of ordinary lives and of finding our place in the world.

'Riveting and thrilling in equal measure. I didn't come up for air until the very last page' Patricia Gibney 'Compelling and clever. They All Lied grips you from the opening page and doesn't let you go' Brian McGilloway 'MUM, LISTEN TO ME. DO EXACTLY AS I SAY, OR WE COULD BOTH END UP DEAD.' It seems like any other morning at Nadine Fitzmaurice's office job, until she receives a shocking phone call from her teenage daughter. Becca confesses to killing someone, saying she is now being held

hostage. And Nadine must follow a series of mysterious instructions in order to keep her alive. Terrified but determined to save her daughter, Nadine finds herself dragged into the underworld of organised crime, lying to everyone in her life to protect Becca. But as Becca's captors increase their demands, secrets from Nadine's past rush to the surface, including memories of a teenager who went missing and never came home. Could there be a link to her disappearance and the danger Becca is in now? And if someone is out for revenge, can Nadine rescue her daughter before it's too late? 'One of the most original and distinctive voices in Irish crime fiction.' Jane Casey 'Cleverly plotted and deftly woven, with surprises at every turn.' Andrea Mara 'An explosive thriller with brilliant twists.' Anthony Quinn 'From the opening psychological dilemma to the breathtaking denouement, *They All Lied* is Louise Phillips' best yet' Sharon Dempsey

The present book includes a set of selected extended papers from the 11th International Conference on Informatics in Control, Automation and Robotics (ICINCO 2014), held in Vienna, Austria, from 1 to 3 September 2014. The conference brought together researchers, engineers and practitioners interested in the application of informatics to Control, Automation and Robotics. Four simultaneous tracks will be held, covering Intelligent Control Systems, Optimization, Robotics, Automation, Signal Processing, Sensors, Systems Modelling and Control, and Industrial Engineering, Production and Management. Informatics applications are pervasive in many areas of Control, Automation and Robotics. ICINCO 2014 received 301 submissions, from 49 countries, in all continents. After a double blind paper review performed by the Program Committee, 20% were accepted as full papers and thus selected for oral presentation. Additional papers were accepted as short papers and posters. A further selection was made after the Conference, based also on the assessment of presentation quality and audience interest, so that this book includes the extended and revised versions of the very best papers of ICINCO 2014. Commitment to high quality standards is a major concern of ICINCO that will be maintained in the next editions, considering not only the stringent paper acceptance ratios but also the quality of the program committee, keynote lectures, participation level and logistics.

This book provides a collection of comprehensive research articles on data analytics and applications of wearable devices in healthcare. This Special Issue presents 28 research studies from 137 authors representing 37 institutions from 19 countries. To facilitate the understanding of the research articles, we have organized the book to show various aspects covered in this field, such as eHealth, technology-integrated research, prediction models, rehabilitation studies, prototype systems, community health studies, ergonomics design systems, technology acceptance model evaluation studies, telemonitoring systems, warning systems, application of sensors in sports studies, clinical systems, feasibility studies, geographical location based systems, tracking systems, observational studies, risk assessment studies, human activity recognition systems, impact measurement systems, and a systematic review. We would like to take this opportunity to invite high quality research articles for our next Special Issue entitled “Digital Health and Smart Sensors for Better Management of Cancer and Chronic Diseases” as a part of Sensors journal.

This book describes in detail the specific aspects of ECG during childhood and adolescence,

pursuing an accessible, didactic and easy-to-read approach. Instructive, self-contained and intelligently written, it succeeds in making this diagnostic tool, the interpretation of which is especially complex in younger patients, more comprehensible, while also offering a sound and extensive reference guide for all those who diagnose young patients with electrocardiography. Though ECG produces a relatively simple set of readings, its interpretation and diagnosis are complex. If misinterpreted, a “butterfly effect” of hidden, often neglected heart signals can lead to important and sometimes devastating consequences. Featuring an exceptionally wide range of ECG recordings and examples, the volume sheds new light on the importance of electrophysiological examinations for patients still in their developmental years and provides advice on the use of ECG in connection with recent regulations on the participation of children, adolescents and young athletes in sports. Thanks to the variety of scenarios described, from the most frequent to the most insidious, this work will appeal to a broad readership, from cardiologists and pediatricians to family physicians, anesthesiologists, doctors in sports medicine, students and nurses.

The articles in The Encyclopedia of Medical Devices and Instrumentation focus on what is currently useful or is likely to be useful in future medicine. They answer the question, What are the branches of medicine and how does technology assist each of them? Articles focus on the practice of medicine that is assisted by devices, rather than including, for example, the use of drugs to treat disease. The title is the only resource on the market dealing with the subject in encyclopedic detail. * Accessible to practitioners with a broad range of backgrounds from students to researchers and physicians * Articles cover the latest developments such as nanotechnology, fiber optics, and signal processing

A tale of apocalyptic destruction told by a survivor. The Fires of Orc is dystopian science fiction with a contemporary theme, tracing the fall of civilization in the age of quantum computing. Political intrigue, love of power and hubris - all told in a literary style that invokes Philip K. Dick, Ursula Le Guin and other masters of the genre. The debut novel from acclaimed editorial writer Tony Phillips, The Fires of Orc is one of 2017’s most talked about cross-genre books, blending classic themes with postmodern style and a nod to the prose of a bygone century.
