This overview of interactive videodisc technology is designed to assist educators in finding the appropriate equipment and software for any specific application. The handbook may also serve as a starting point for many educators who know nothing of the technology and assist them in deciding whether this technology is worth pursuing as an educational tool in specific situations. Although not comprehensive, the listings reflect a good portion of the videodisc-related products available today and the prices provide a good indication of the general price range of specific items. The handbook contains 10 chapters: (1) Introduction to Videodiscs; (2) Overview of Laser Disc Systems; (3) Selecting a Laser Videodisc Player; (4) Video Playback Units; (5) Videodisc Interface Units; (6) Disc Player Peripherals; (7) Videodisc System Packages; (8) Educational Videodisc Software; (9) Interactive Videodisc Authoring Languages; and (10) Videodisc Care and Maintenance. Appendices include directories of laser disc players; television monitors and projects; laser disc interfaces; laser disc peripherals; laser disc system packages; videodisc software (listed by subject area); videodisc mastering options; interactive authoring languages; service information; and videodisc resources, which includes a manufacturer's index. This report contains information regarding ignitron firing circuitry. It also discusses the theory of cathode spot formation and arc mechanism. Triggering methods are examined with regard to jitter and delay in arc formation and the interaction of the anode and ignitor circuits is illustrated by an equation which defines the capability of a firing system.

The annual series Global Conferences on Sustainable Manufacturing (GCSM) sponsored by the International Academy for Production Engineering (CIRP) is committed to excellence in the creation of sustainable products and processes that conserve energy and natural resources, have minimal negative impacts upon the natural environment and society, and adhere to the core principle of sustainability by considering the needs of the present without compromising the ability of future generations to meet their own needs. To promote this noble goal, there is a great need for increased awareness in education and training, including the dissemination of new findings on principles and practices of sustainability applied to manufacturing. The series Global Conferences on Sustainable Manufacturing offers international colleagues the opportunity to network, expand their knowledge, and improve practice globally.

Developed by the National Academy of Sports Medicine (NASM), this book is designed to help people prepare for the NASM Certified Personal Trainer (CPT) Certification exam or learn the basic principles of personal training using NASM's Optimum Performance Training (OPT) model. The OPT model presents NASM's protocols for building stabilization, strength, and power. More than 600 full-color illustrations and photographs demonstrate concepts and techniques. Exercise color coding maps each exercise movement to a specific phase on the OPT model. Exercise boxes demonstrate core exercises and detail the necessary preparation and movement. Other features include research notes, memory joggers, safety tips, and review questions.

Sally Phipps was only three years old and the veteran winner of several beautiful baby contests when she appeared as the Baby in the film "Broncho Billy And The Baby." It was made at the Niles California Essanay Studio in late 1914. This book follows her amazing life and a career that culminated in her receiving the Rosemary (for remembrance) Award shortly before her death in 1978. Her memories of the early years at Essanay include sitting on Charlie Chaplin's lap and enduring a frightening stage coach accident. In her teens, she was a Fox Studio star appearing in 20 films, including a cameo in the classic "Sunrise." There were bad times also. She was on the set of her Fox two-reel comedy "Gentlemen Prefer Scotch" in 1927 when word reached her of the scandalous death of her father, a state senator. But in that same year, she was selected as one of the 13 Wampas Baby Stars, starlets that were considered destined for future success. Despite her popularity in Hollywood, she left for New York where she became the darling of gossip columnists, particularly Walter Winchell. She appeared in two Broadway shows, made a Vitaphone comedy short, and married and divorced one of the Gimbel department store moguls before she darted off for India and around the world travel. Back in New York, there was another marriage, two children, and later a stay in Hawaii. Earl Wilson wrote about her in 1938 when she was working for the Federal Theatre Project during the WPA period -- headlining

his column "Wampas Ex-Baby Lives On WPA \$23 - And Likes It."

Her images - especially her pinup photographs - have become highly collectible. The book features 150 pictures from Sally's personal and professional life, including glamorous portraits and pinups.

This book presents WHO guidelines for the protection of public health from risks due to a number of chemicals commonly present in indoor air. The substances considered in this review, i.e. benzene, carbon monoxide, formaldehyde, naphthalene, nitrogen dioxide, polycyclic aromatic hydrocarbons (especially benzo[a]pyrene), radon, trichloroethylene and tetrachloroethylene, have indoor sources, are known in respect of their hazardousness to health and are often found indoors in concentrations of health concern. The guidelines are targeted at public health professionals involved in preventing health risks of environmental exposures, as well as specialists and authorities involved in the design and use of buildings, indoor materials and products. They provide a scientific basis for legally enforceable standards.

Through ten editions, Fox and McDonald's Introduction to Fluid Mechanics has helped students understand the physical concepts, basic principles, and analysis methods of fluid mechanics. This market-leading textbook provides a balanced, systematic approach to mastering critical concepts with the proven Fox-McDonald solution methodology. In-depth yet accessible chapters present governing equations, clearly state assumptions, and relate mathematical results to corresponding physical behavior. Emphasis is placed on the use of control volumes to support a practical, theoretically-inclusive problem-solving approach to the subject. Each comprehensive chapter includes numerous, easy-to-follow examples that illustrate good solution technique and explain challenging points. A broad range of carefully selected topics describe how to apply the governing equations to various problems, and explain physical concepts to enable students to model real-world fluid flow situations. Topics include flow measurement,

dimensional analysis and similitude, flow in pipes, ducts, and open channels, fluid machinery, and more. To enhance student learning, the book incorporates numerous pedagogical features including chapter summaries and learning objectives, end-of-chapter problems, useful equations, and design and open-ended problems that encourage students to apply fluid mechanics principles to the design of devices and systems.

The trouble from which great events were to come began when Everard Dominey, who had been fighting his way through the scrub for the last three quarters of an hour towards those thin, spiral wisps of smoke, urged his pony to a last despairing effort and came crashing through the great oleander shrub to pitch forward on his head in the little clearing. It developed the next morning, when he found himself for the first time for many months on the truckle bed, between linen sheets, with a cool, bamboo-twisted roof between him and the relentless sun. He raised himself a little in the bed. "Where the mischief am I?" he demanded. A black boy, seated cross-legged in the entrance of the banda, rose to his feet, mumbled something and disappeared. In a few moments the tall, slim figure of a European, in spotless white riding clothes, stooped down and came over to Dominey's side.
