Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Hi-fi News World Scientific

An analysis of the ways that software creates new spatialities in everyday life, from supermarket checkout lines to airline flight paths. After little more than half a century since its initial development, computer code is extensively and intimately woven into the fabric of our everyday lives. From the digital alarm clock that wakes us to the air traffic control system that guides our plane in for a landing, software is shaping our world: it creates new ways of undertaking tasks, speeds up and automates existing practices, transforms social and economic relations, and offers new forms of cultural activity, personal empowerment, and modes of play. In *Code/Space*, Rob Kitchin and Martin Dodge examine software from a spatial perspective, analyzing the dyadic relationship of software and space. The production of space, they

argue, is increasingly dependent on code, and code is written to produce space. Examples of code/space include airport check-in areas, networked offices, and cafés that are transformed into workspaces by laptops and wireless access. Kitchin and Dodge argue that software, through its ability to do work in the world, transduces space. Then Kitchin and Dodge develop a set of conceptual tools for identifying and understanding the interrelationship of software, space, and everyday life, and illustrate their arguments with rich empirical material. And, finally, they issue a manifesto, calling for critical scholarship into the production and workings of code rather than simply the technologies it enables—a new kind of social science focused on explaining the social, economic, and spatial contours of software.

*Boys' Life* is the official youth magazine for the Boy Scouts of America. Published since 1911, it contains a proven mix of news, nature, sports, history, fiction, science, comics, and Scouting.

Advanced Concepts for Intelligent Vision Systems M.E. Sharpe

This story starts with the death of an old man, Alexander (Alex) Sykes, and his afterlife life. Upon his return from a trip to the astral plane, he discovers that police have been called to his apartment. He quickly finds out why: he was dead. Alex was looking at his own corpse! There was nothing that he can do now, so he

left. Alex looked into the night sky and said, I want to go there, and he was off. He couldn't explain it, so he just went with it. He discovered several inhabited planets, some with what are probably animal life, but as to whether they were sentient, Alex didn't know. After a few more planets, Alex found the Qythe—definitely intelligent on a planet that was more urban than not. After his first contact with the Qythe, Alex discovers that they have an advanced mental ability that our earthly computers can't match. Yet despite their great intellects and history, they are doomed, and unless Alex and his growing circle of friends and allies can help, the Qythe will die. So Alex, with his own mental ability, discovered by accident, does what it takes to convince others of the need to work together to save his new friends: Dr. Philips, physicist of JPL; Dr. Bernstein, director of Physics, JPL; Dr. Colin Andres, psychiatrist/parapsychologist, JPL; Dr. Dawn Runningdeer, quantum physics, West Coast Institute of Technology; and Rosa Seville, former NASA astronaut. These and others will be responsible for the salvation of the Qythe, but even with the help of advanced science from the Qythe, can Alex and his human friends pull it off and still deal with the threat of destruction from one of his own?

Held to be the fourth largest economy by dint of its purchasing power, India is part of the G-20 major economies with significant influence on regional and global affairs.

This book traces the evolution of business in India from the pre-British Raj days to look at the forces that have shaped Indian commerce and economy. From indigenous business and financial practices to the role of family business and state-owned public sector enterprises, the influence of global business on India, successful business practices of modern India, and the Indian story in modern times—the book presents a well-rounded picture of the country's position in the global business scenario.

Looking at the sustainability of the Indian dream, the narrative is supported by case studies of organizations like ITC Limited, ICI India Limited, HCL Limited, and Ranbaxy Laboratories Limited.
