This report contains information regarding ignitron firing circuitry. It also discusses the theory of cathode spot formation and arc mechanism. Triggering methods are examined with

regard to jitter and delay in arc formation and the interaction of the anode and ignitor circuits is illustrated by an equation which defines the capability of a firing system.

It was made at the Niles California Essanay Studio in late 1914. This book follows her amazing life and a career that culminated in her receiving the Rosemary (for remembrance) Award shortly before her death in 1978. Her memories of the early years at Essanay include sitting on Charlie Chaplin's lap and enduring a frightening stage coach accident. In her teens, she was a Fox Studio star appearing in 20 films, including a cameo in the classic "Sunrise." There were bad times also. She was on the set of her Fox two-reel comedy "Gentlemen Prefer Scotch" in 1927 when word reached her of the scandalous death of her father, a state senator. But in that same year, she was selected as one of the 13 Wampas Baby Stars, starlets that were considered destined for future success. Despite her popularity in Hollywood, she left for New York where she became the darling of gossip columnists, particularly Walter Winchell. She appeared in two Broadway shows, made a Vitaphone comedy short, and married and divorced one of the Gimbel department store moguls before she darted off for India and around the world travel. Back in New York, there was another marriage, two children, and later a stay in Hawaii. Earl Wilson wrote about her in 1938 when she was working for the Federal Theatre Project during the WPA period -- headlining

including glamorous

This book presents WHO  
guidelines for the  
protection of public  
health from risks due  
to a number of  
chemicals commonly

present in indoor air.  
The substances  
considered in this  
review, i.e. benzene,  
carbon monoxide,  
formaldehyde,  
naphthalene, nitrogen  
dioxide, polycyclic  
aromatic hydrocarbons  
(especially  
benzo[a]pyrene), radon,  
trichloroethylene and  
tetrachloroethylene,  
have indoor sources,  
are known in respect of  
their hazardousness to  
health and are often  
found indoors in  
concentrations of  
health concern. The  
guidelines are targeted

at public health  
professionals involved  
in preventing health  
risks of environmental  
exposures, as well as  
specialists and  
authorities involved in  
the design and use of  
buildings, indoor  
materials and products.  
They provide a  
scientific basis for  
legally enforceable  
standards.

propulsion was considered the technology of the future. Now, the future has arrived. This important new book explains the fundamentals of electric propulsion for spacecraft and describes in detail the physics and characteristics of the two major electric thrusters in use today, ion and Hall thrusters. The authors provide an introduction to

plasma physics in order to allow readers to understand the models and derivations used in determining electric thruster performance. They then go on to present detailed explanations of: Thruster principles Ion thruster plasma generators and accelerator grids Hollow cathodes Hall thrusters Ion and Hall thruster plumes Flight ion and Hall thrusters Based

largely on research and development performed at the Jet Propulsion Laboratory (JPL) and complemented with scores of tables, figures, homework problems, and references, Fundamentals of Electric Propulsion: Ion and Hall Thrusters is an indispensable textbook for advanced undergraduate and graduate students who are preparing to

---

enter the aerospace industry. It also serves as an equally valuable resource for professional engineers already at work in the field.
