E. H. Gombrich's Little History of the World, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages. Gombrich was of course the best-known art historian of his time, and his text suggests illustrations on every page. This illustrated edition of the Little History brings together the pellucid humanity of his narrative with the images that may well have been in his mind's eye as he wrote the book. The two hundred illustrations—most of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author's intention, and deepen the pleasure of reading this remarkable work. For this edition the text is reset in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs, and symbols. The book incorporates freshly drawn maps, a revised preface, and a new index. Blending high-grade design, fine paper, and classic binding, this is both a sumptuous gift book and an enhanced edition of a timeless account of human history.

The epic wisdom contained in a lost library helps the author turn his life around  
John Kaag is a dispirited young philosopher at sea in his marriage and his career when he stumbles upon West Wind, a ruin of an estate in the hinterlands of New Hampshire that belonged to the eminent Harvard philosopher William Ernest Hocking. Hocking was one of the last true giants of American philosophy and a direct intellectual descendent of William James, the father of American philosophy and psychology, with whom Kaag feels a deep kinship. It is James' s question " Is life worth living? " that guides this remarkable book. The books Kaag discovers in the Hocking library are crawling with insects and full of mold. But he resolves to restore them, as he immediately recognizes their importance. Not only does the library at West Wind contain handwritten notes from Whitman and inscriptions from Frost, but there are startlingly rare first editions of Hobbes, Descartes, and Kant. As Kaag begins to catalog and read through these priceless volumes, he embarks on a thrilling journey that leads him to the life-affirming tenets of American philosophy—self-reliance, pragmatism, and transcendence—and to a brilliant young Kantian who joins him in the restoration of the Hocking books. Part intellectual history, part memoir, American Philosophy is ultimately about love, freedom, and the role that wisdom can play in turning one' s life around.

### From Plato and Socrates to Ethics and Metaphysics, an Essential Primer on the History of Thought Routledge

Winner of the 2010 National Book Critics Circle Award for Biography  
How to get along with people, how to deal with violence, how to adjust to losing someone you love—such questions arise in most people' s lives. They are all versions of a bigger question: how do you live? How do you do the good or honorable thing, while flourishing and feeling happy? This question obsessed Renaissance writers, none more than Michel Eyquem de Montaigne, perhaps the first truly modern individual. A nobleman, public official and wine-grower, he wrote free-roaming explorations of his thought and experience, unlike anything written before. He called them " essays, " meaning " attempts " or " tries. " Into them, he put whatever was in his head: his tastes in wine and food, his childhood memories, the way his dog' s ears twitched when it was dreaming, as well as the appalling events of the religious civil wars raging around him. The Essays was an instant bestseller and, over four hundred years later, Montaigne' s honesty and charm still draw people to him. Readers come in search of companionship, wisdom and entertainment—and in search of themselves. This book, a spirited and singular biography, relates the story of his life by way of the questions he posed and the answers he explored. It traces his bizarre upbringing, youthful career and sexual adventures, his travels, and his friendships with the scholar and poet Étienne de La Boétie and with his adopted " daughter, " Marie de Gournay. And we also meet his readers—who for centuries have found in Montaigne an inexhaustible source of answers to the haunting question, " how to live? "

Philosophy begins with questions about the nature of reality and how we should live. These were the concerns of Socrates, who spent his days in the ancient Athenian marketplace asking awkward questions, disconcerting the people he met by showing them how little they genuinely understood. This engaging book introduces the great thinkers in Western philosophy and explores their most compelling ideas about the world and how best to live in it. In forty brief chapters, Nigel Warburton takes us on a chronological tour of the major ideas in the history of philosophy. He provides interesting and often quirky stories of the lives and deaths of thought-provoking philosophers from Socrates, who chose to die by hemlock poisoning rather than live on without the freedom to think for himself, to Peter Singer, who asks the disquieting philosophical and ethical questions that haunt our own times. Warburton not only makes philosophy accessible, he offers inspiration to think, argue, reason, and question in the tradition of Socrates. "A Little History of Philosophy" presents the grand sweep of humanity's search for philosophical understanding and invites all to join in the discussion.
