PhotoModeler Points Project Walk-through Tutorial (older interface)
Before using PhotoModeler or any photogrammetry program to do surveying, one must determine the characteristics of the camera-and-lens combination employed via a process called calibration, and

PhotoModeler supplies a set of procedures to accomplish that. 3 The calibration process was not onerous, and there is a "Wizard," in the computer-speak of the day, to guide the user through the process.

PhotoModeler is a software application that performs image-based modeling and close range stereophotogrammetry - producing 3D models and measurements from photography. The software is used for close-range, aerial and uav photogrammetry. Close Range Photogrammetry (CRP) can mean photographs taken from the ground with a handheld camera, or taken from a UAV/drone at relatively low altitude ...
