Real Estate, Construction and Economic Development in Emerging Market Economies examines the relationships between real estate and construction sectors and explores how each sector, and the relationships between them, affect economic development in emerging market economies (EMEs). Throughout the book, the international team of contributors discuss topics as diverse as real estate finance and investment, housing, property development, construction project management, valuation, sustainability and corporate real estate. In doing so the book demonstrates how the relationship between construction and real estate impacts on economic development in countries such as Argentina, Brazil, Colombia, China, Ghana, Nigeria, Turkey, Lithuania, Hungary and Slovenia. Topics include: the role of real estate brokerage in improving the living standards of citizens; the effect of a mineral boom on construction cycles, real estate values and the socio-economic conditions of people in boom towns and cities; corporate real estate management practices and how they affect economic growth; and the synergies between construction and real estate and how they, in turn, affect economic development. This book will be of interest to those studying and researching real estate, construction, development studies, urban economics and emerging market economies.

There is increasing interest in the scientific literature on immigrant health and its impact on disease transmission, disease prevention, health promotion, well-being on an individual and population level, health policy, and the cost of managing all these issues on an individual, institutional, national, and global level. The need for accurate and up-to-date information is particularly acute due to the increasing numbers of immigrants and refugees worldwide as the result of natural disasters, political turmoil, the growing numbers of immigrants to magnet countries, and the increasing costs of associated health care that are being felt by governments around the world. Format and Scope: The first portion of the encyclopedia contains chapters that are approximately 25 to 40 manuscript pages in length. Each overview chapter includes a list of references and suggested readings for cross referencing within the encyclopedia. The opening chapters are: Immigration in the Global Context, Immigration Processes and Health in the U.S.: A Brief History, Alternative and Complementary Medicine, Culture-Specific Diagnoses, Health Determinants, Occupational and Environmental Health, Methodological Issues in Immigrant Health Research, Ethical Issues in Research with Immigrants and Refugees, Ethical Issues in the Clinical Context. The second portion of the book consists of alphabetical entries that relate to the health of immigrants. Entries are interdisciplinary and are drawn from the following fields of study: anthropology, demographics, history, law, linguistics, medicine, population studies, psychology, religion, and sociology. Each entry is followed by a listing of suggested readings and suggested resources, and also links to related terms within the whole book. Outstanding Features The book adopts a biopsychosocial-historical approach to the topics covered in the chapters and the entries. Each entry includes suggested readings and suggested resources. The chapters and entries are written graduate level that is accessible to all academics, researchers, and professionals from diverse backgrounds. We consider the audience for the entries to be well educated, but a non expert in this area. The primary focus of the book is on the immigrant populations in and immigration to magnet countries. References are made to worldwide trends and issues arising globally. In addition to the comprehensive subject coverage the text also offers diverse perspectives. The editors themselves reflect the multidisciplinary nature of the topics, with expertise in psychiatry, law, epidemiology, anthropology, and social work. Authors similarly reflect diverse disciplines.

Conventional interpretations of the New Economic Policy introduced in India in 1991 see this program of economic liberalization as transforming the Indian economy and leading to a substantial increase in the rate of India’s economic growth. But in a country like India, growth is not enough. Who benefits from the new growth regime, and can it significantly improve the conditions of livelihood for India’s 800 million people with incomes below \$2.00 a day? This edited volume looks at international policy regimes and their national adoption under strategic conditions of economic crisis and coercion, and within longer-term structural changes in the power calculus of global capitalism. The contributors examine long-term growth tendencies, poverty and employment rates at the national level, regional level and local levels in India; the main growth centers; the areas and people left out; the advantages and deficiencies of the existing policy regime, and alternative economic policies for India. Bringing together the leading figures in the discussion on India’s economic policy, this volume is the authoritative critical study of India’s New Economic Policy.

Is there a universal right to the free expression and preservation of cultural heritage, and if so, where is that right articulated and how can it be protected? No corner of today's world has escaped the effects of globalization – for better or worse. This volume addresses a deeply political aspect of heritage preservation and management as it relates to human rights.

The birthplace of Mahatma Gandhi and the land that produced Mohammad Ali Jinnah, the founder of Pakistan, Gujarat has been at the centre-stage of South Asia’s political iconography for more than a century. As Gujarat, created as a separate state in 1960, celebrates its golden jubilee this collection of essays critically explores the many paradoxes and complexities of modernity and politics in the state. The contributors provide much-needed insights into the dominant impulses of identity formation, cultural change, political mobilisation, religious movements and modes of communication that define modern Gujarat. This book touches upon a fascinating range of topics – the identity debates at the heart of the idea of modern Gujarat; the trajectory of Gujarati politics from the 1950s to the present day; bootlegging, the practice of corruption and public power; vegetarianism and violence; urban planning and the enabling infrastructure of antagonism; global diasporas and provincial politics – providing new insights into understanding the enigma of Gujarat. Going well beyond the boundaries of Gujarat and engaging with larger questions about democracy and diversity in India, this book will appeal to those interested in South Asian Studies, politics, sociology, history as well as the general reader. This book was published as a special issue of South Asian History and Culture.

With nearly a quarter of the world's population, members of at least five major language families plus several putative language isolates, South Asia is a fascinating arena for linguistic investigations, whether comparative-historical linguistics, studies of language contact and multilingualism, or general linguistic theory. This volume provides a state-of-the-art survey of linguistic research on the languages of South Asia, with contributions by well-known experts. Focus is both on what has been accomplished so far and on what remains unresolved or controversial and hence offers challenges for future research. In addition to covering the languages, their histories, and their genetic classification, as well as phonetics/phonology, morphology, syntax, and sociolinguistics, the volume provides special coverage of contact and convergence, indigenous South Asian grammatical traditions, applications of modern technology to South Asian languages, and South Asian writing systems. An appendix offers a classified listing of major sources and resources, both digital/online and printed.

This book – “Disaster Management in India: Challenges and Strategies” - provides a practical and realistic understanding of the evolving status of disaster management in India. The book discusses techno-legal systems for disaster management and their real-life effectiveness based upon the author’s own professional experience as well as available literature including studies, reviews and audits reports.A case study of the 2001 Bhuj Earthquake conducted by the author is at the nucleus of the book and provides a clear understanding on how interdependent sub-systems (social, organisational, infrastructure) can fail during sever incidents, and the consequences thereof.Lack of resources, lack of coordination, and poor communication are endemic to severely damaged disaster environments like the 2001 Bhuj earthquake and are very commonly seen across the world. What is more important for the future is that new methods are being evolved that overcome the potential risks posed by such

initial conditions for improving organizational performance. Lessons from the 2001 Bhuj earthquake highlighted in this book are still relevant and provide directions for well-designed future interventions. The book critically examines performance status of disaster management in the post DM Act 2005 period and identifies many relevant issues and challenges – including development of effective institutions for disaster risk management. At the end, the book proposes intervention strategies for strengthening and improving disaster management systems keeping in mind the latest developments and best-practices suited to Indian conditions. Drawing on the author's decades of experience both in the domains of disaster management and technology, the book provides tips on - Emergency Operations Center design and development; Media integration into DM, emergency Resources Management systems development and Crowd management.

The Taste of British South Asian Theatres: Aesthetics and Production offers critical analysis of eight British Asian performances, using an east-west approach of references and theories, the latter including the Rasa theory of the Natyashastra, Brecht's Gestus and semiotics, making a striking contribution to the understanding of one of the most outstanding examples of diasporic artistic activity in recent history. With illustrations, the productions discussed are The Marriage of Figaro (Tara Arts), Curry Tales (Rasa Productions), Mr Quiver: intimate (Rajni Shah), Rafta, Rafta...(National Theatre), Nowhere to Belong: Tales of an Extravagant Stranger (RSC/Tara Arts), A Fine Balance (Tamasha), Deadeye (Kali Theatre) and the Gujarati play Lottery Lottery (Shivam Theatre). "In the search for new models of criticism, Patel's study of eight performances has advanced a subtle recipe that provides a new resource for diaspora studies." -Graham Ley Emeritus Professor of Drama & Theory, University of Exeter

An approach to comparative economic systems that avoids simple dichotomies to examine a wide variety of institutional and systemic arrangements, with updated country case studies. Comparative economics, with its traditional dichotomies of socialism versus capitalism, private versus state, and planning versus market, is changing. This innovative textbook offers a new approach to understanding different economic systems that reflects both recent transformations in the world economy and recent changes in the field. This new edition examines a wide variety of institutional and systemic arrangements, many of which reflect deep roots in countries' cultures and histories. The book has been updated and revised throughout, with new material in both the historical overview and the country case studies. It offers a broad survey of economic systems, then looks separately at market capitalism, Marxism and socialism, and “new traditional economies” (with an emphasis on the role of religions, Islam in particular, in economic systems). It presents case studies of advanced capitalist nations, including the United States, Japan, Sweden, and Germany; alternative paths in the transition from socialist to market economies taken by such countries as Russia, the former Soviet republics, Poland, China, and the two Koreas; and developing countries, including India, Iran, South Africa, Mexico, and Brazil. The new chapters on Brazil and South Africa complete the book's coverage of all five BRICS nations; the chapter on South Africa extends the book's comparative treatment to another continent. The chapter on Brazil with its account of the role of the Amazon rain forest as a great carbon sink expands the coverage of global environmental and sustainability issues. Each chapter ends with discussion questions.

The Hindu sect the Vallabha Sampradaya was founded in India in the 15th century by a devotional saint, Vallabhacharya. Their bhakti tradition worships a variety of forms of Krishna as a seven-year-old child. Following U.S. immigration reforms in 1965, members of the sect established a spiritual headquarters for the faith in Pennsylvania and began to construct temples across the United States. Since then, the growth has continued as this 500-year-old faith becomes an American religion, as this work demonstrates.

The continuous search for improved methods of public equity financing has resulted in the derivation of alternative models for listing companies on stock exchanges through so-called shell companies. Since such an entity has no operations of its own, its sole purpose is to find an operating company it can ultimately be merged with through the use of proceeds acquired from the initial shell listing. Axel Moeller seeks to answer the questions pertaining to the practical implementation of such alternative listing models in Germany from a law and economics perspective. In light of the fact that a legal framework with regard to shell listings does not exist, the underlying legal analysis is based on the accumulation of general principles derived from German business and capital markets law. From an economic and financial perspective, the ensuing analysis demonstrates the potential efficiency gains of a shell listing for small and medium-sized German enterprises.
