The Handbook of Research on STEM Education represents a groundbreaking and comprehensive synthesis of research and presentation of policy within the realm of science, technology, engineering, and mathematics (STEM) education. What distinguishes this Handbook from others is the nature of integration of the disciplines that is the founding premise for the work – all chapters in this book speak directly to the integration of STEM, rather than discussion of research within the individual content areas. The Handbook of Research on STEM Education explores the most pressing areas of STEM within an international context. Divided into six sections, the authors cover topics including: the nature of STEM, STEM learning, STEM pedagogy, curriculum and assessment, critical issues in STEM, STEM teacher education, and STEM policy and reform. The Handbook utilizes the lens of equity and access by focusing on STEM literacy, early childhood STEM, learners with disabilities, informal STEM, socio-scientific issues, race-related factors, gender equity, cultural-relevancy, and parental involvement. Additionally, discussion of STEM education policy in a variety of countries is included, as well as a focus on engaging business/industry and teachers in advocacy for STEM education. The Handbook 's 37 chapters provide a deep and meaningful landscape of the implementation of STEM over the past two decades. As such, the findings that are presented within provide the reader with clear directions for future research into effective practice and supports for integrated STEM, which are grounded in the literature to date.

Most social scientific work on intimate relationships has assumed a monogamous structure, or has considered anything other than monogamy only in the context of 'infidelity'. Yet, in recent years there has been a growing interest among researchers and the public in exploring various patterns of intimacy that involve open non-monogamy. This volume gathers contributions from academics, activists, and practitioners throughout the world to explore non-monogamous relationships. Featuring both empirical and theoretical pieces, contributors examine the history and cultural basis of various forms of non-monogamy, experiences of non-monogamous living, psychological understandings of relationship patterns, language and emotion, the discursive construction of mono-normativity as well as issues of race, class, disability, sexuality and gender. This volume will be of interest to academics and practitioners working in the social sciences and anyone who is seeking greater insight into the intricacies of non-monogamous relationships.

Praxis II Health and Physical Education Content Knowledge 5857 Exam Flashcard Study System Routledge Equity, Justice and the Sustainable City series

Combining elements of sustainable and resilient cities agendas, together with those from social justice studies, and incorporating concerns about good governance, transparency and accountability, the book presents a coherent conceptual framework for the ethical city, in which to embed existing and new activities within cities so as to guide local action. The authors' observations are derived from city-specific surveys and urban case studies. These reveal how progressive cities are promoting a diverse range of ethically informed approaches to urbanism, such as community wealth building, basic income initiatives, participatory budgeting and citizen assemblies. The text argues that the ethical city is a logical next step for critical urbanism in the era of late capitalism, characterised by divisive politics, burgeoning inequality, widespread technology-induced disruptions to every aspect of modern life and existential threats posed by climate change, sustainability imperatives and pandemics. Engaging with their communities in meaningful ways and promoting positive transformative change, ethical cities are well placed to deliver liveable and sustainable places for all, rather than only for wealthy elites. Likewise, the aftermath of shocks such as the 2008 Global Financial Crisis and the Covid-19 pandemic reveals that

cities that are not purposeful in addressing inequalities, social problems, unsustainability and corruption face deepening difficulties. Readers from across physical and social sciences, humanities and arts, as well as across policy, business and civil society, will find that the application of ethical principles is key to the pursuit of socially inclusive urban futures and the potential for cities and their communities to emerge from or, at least, ameliorate a diverse range of local, national and global challenges.

A valuable feature of this scholarly work is its translation of Francis Clerke's Praxis Supremae Curiae Admiraltatis. First published in London in 1679 and translated into English in 1722, Lord Harwicke described it as of "unquestionable credit." Hall's translation, the best to that date, incorporated materials from manuscripts unavailable previously. In addition, he added a history of Anglo-American admiralty law, an extended discussion of American admiralty practice and a useful compendium of relevant cases. This book engages the critical theory of political philosopher Herbert Marcuse to imagine spaces of resistance and liberation from the repressive forces of late capitalism. Marcuse, an influential counterculture voice in the 1960s, highlighted the "smooth democratic unfreedom" of postwar capitalism, a critique that is well adapted to the current context. The compilation begins with a previously unpublished lecture delivered by Marcuse in 1966 addressing the inadequacy of philosophy in its current form, arguing how it may be a force for liberation and social change. This lecture provides a theoretical mandate for the volume 's original contributions from international scholars engaging how topics such as higher education, aesthetics, and political organization can contribute to the project of building a critical rationality for a qualitatively better world, offering an alternative to the bleak landscape of neoliberalism. The essays in this volume as whole engage the current context with an urgency appropriate to the problems facing an encroaching authoritarianism in political society with an interdisciplinary lens that speaks to the complexity of the problems facing modern society. The chapters originally published as a special issue in New Political Science.
