**Edexcel AS Physics Student Unit Guide New Edition: Unit 1 Physics on the Go**

Oswaal Books and Learning Private Limited

Originally published in 1972, the emphasis of this book is on psychological and cultural understanding of education, in terms of persons and relationships, rather than processes. The book: Deals with issues of continuing relevance for educational thought and practice, such as the education and training of teachers and diminishing the

gap between schooling and education.

- Considers the nature and function of educational research, the conflict between arts and sciences in education and the concept of guidance.
- Examines teaching in its interpersonal context, and at the revolt of youth and the sexual revolution.
- Assesses the influence of Freud, Winifred Mercier, William Boyd and Herbert Read.

*Objectives and Perspectives in Education* Pearson Education India

The Concrete Solutions series of International Conferences on Concrete Repair began in 2003, with a conference held in St. Malo,

---

France in association with INSA Rennes, followed by the second conference in 2006 ( with INSA again, at St. Malo, France), and the third conference in 2009 (in Padova and Venice, in association with the University of Padova). Now in 2011, the event is being held in Dresden in Germany and has brought together some 112 papers from 33 countries. Whereas electrochemical repair tended to dominate the papers in earlier years, new

developments in structural strengthening with composites have been an increasingly important topic, with a quarter of the papers now focusing on this area. New techniques involving Near Surface Mounted (NSM) carbon fibre rods, strain hardening composites, and new techniques involving the well established carbon fibre and polyimide wrapping and strengthening systems are presented. Seventeen papers

concentrate on case studies which are all-important in such conferences, to learn about what works (and what doesn't work) on real structures. Thirteen papers are devoted to new developments in Non-Destructive Testing (NDT). Other topics include service life modelling, fire damage, surface protection methods and coatings, patch repair, general repair techniques and whole life costing. This book is essential reading for anyone engaged in the concrete repair field, from

---

engineers, to academics and students and also to clients, who, as the end user, are ultimately responsible for funding these projects and making those difficult decisions about which system or method to use.
