The Physics of Spirit: God, Heaven and Human Consciousness Sudan Hansraj

Late in 2016, the scientists, with a little help from the big LHC, the particle accelerator down in Cern, finally concluded that there are no physical particles to be found inside this universe!! Meaning only energetic oscillating fields was to be found! Can you even grasp that thought, that everything in this universe, is absolutely anything but being this postulated 3-dimensionally and fully physical universe, that you thought you could understand, and that you have been educated in? Everything you believed this universe to be, does not exist at all!! You don't find anything inside this universe, that is only 3-dimensional and only fully physical! And everything you did not believe in, is the universe we actually live inside, with only energetic oscillating fields! We live inside a paranormal universe with 5 very active quantum physical dimensions! It is actually these two quantum physical dimensions, the 5th and the 4th, that really runs the show! We can only see, discover and detect this universe inside the 3rd dimension, and that dimension is "the quantum physical screen" of the universe! This is where the Higg's field is operating with the funny universal stuff, a stuff that can be there, disappear and reappear again! That leads us into the stealth technology and the physics behind the famous stealth plane, the new 5-dimensional quantum physics! The only kind of believes, and the only kind of

education today, lies inside this 3-dimensional and fully physical standardized big bang model and physics, and all of that is a big lie! That was the final conclusion from the big LHC down in Cern! This very famous and shocking discovery actually proved my new 5-dimensional model, by proving the energetic oscillating quantum physical atom, that lies in a 5-dimensional spacetime. My new 5-dimensional quantum physical model and totally new physics was theoretically fully proven already in 2012! Then the big process writing down all of this new philosophy and theory! Out of that, came the new 5-dimensional quantum physical physics! Very different on any level! This new model matches Einstein's extended relativity theory and can be understood as a Pier Review with Einstein's 5-dimensional model. It explains the gravity, the differentiated expansion, explains the very big inflation, and many more hidden secrets of the universe! Read about the Author, and the book, and understand how this universe was created and how it functions!

Goswami's basic premise is that quantum physics is not only the future of science, but is also the key to understanding consciousness, life, death, God, psychology, and the meaning of life. Quantum physics is an antidote to the moral sterility and mechanistic approach of scientific materialism and is the best and clearest approach to understanding our universe. In short, quantum physics is indeed the theory of everything. Here in 17 chapters, Dr. Goswami and his friends and colleagues discuss, among other things, how quantum physics affects our understanding of: Zen Thoughts, feelings, and intuitions Dreams Karma, death, and reincarnation God's will, evolution, and purpose The meaning of dreams The spiritualization of economics and business, politics and education, and society itself This fascinating new book will appeal to a wide array of readers, ranging from those interested in the new physics to those captivated by the spiritual implications of the latest scientific breakthroughs.

This book is the product of more than half a century of leadership and innovation in physics education. When the first edition of University Physics by Francis W. Sears and Mark W. Zemansky was published in 1949, it was revolutionary among calculus-based physics textbooks in its emphasis on the fundamental principles of physics and how to apply them. The success of University Physics with generations of (several million) students and educators around the world is a testament to the merits of this approach and to the many innovations it has introduced subsequently. In preparing this First Australian SI edition, our aim was to create a text that is the future of Physics Education in Australia. We have further enhanced and developed University Physics to assimilate the best ideas from education research with enhanced problem-solving instruction, pioneering visual and conceptual pedagogy, the first systematically enhanced problems, and the most pedagogically proven and widely used online homework and tutorial system in the world, Mastering Physics.

Eschewing the usual mathematical explanations for physics phenomena, this approachable reference explains complicated scientific concepts in plain English that everyone can understand. Tackling the big issues such as gravity, magnetism, sound, and what really happens in the Large Hadron Collider, this engaging look at physics also spells out why cats always land on their feet, why people appear to have red eyes in photographs, and the real danger of looking at an eclipse. For everyone who ever wondered how a light bulb works or how squirrels avoid electrocution on the power lines, this handbook supplies answers on the physics of everyday life and examines the developments in the exploration of subatomic particles. In addition to the question-and-answer section, an addendum of facts about physicists explains what the Nobel prize is and who has won it, and tells the story of the scientist who was incarcerated for agreeing with Copernicus. Answers more than eight hundred questions about physics, ranging from everyday life applications to the latest explorations in the field.

Our human body-brain is an exquisitely sophisticated electronic device that generates its own electromagnetic conscious "spirit", and provides that spirit with electromagnetic information about this reality. Our human spirit is made of radio wave energy that can be picked up by an EEG and represented as "brainwaves" on a monitor, rather than the shorter faster bandwidth of visible light. But when our conscious spirit is compressed and accelerated it can literally become a spirit that is made of visible light. Light can exist as free energy. Which is how our human spirit can survive its body's death to go and live in an environment that is made of whole white light -- heaven, nirvana, paradise, the All. At the speed of light time becomes eternally long. We can live in an eternity of light. As human spirits we are children of the Gods -- a family. Many humans remain spiritual infants or adolescents. But some humans -- we might call them awakened ones -- are learning how to be spiritual adults.
