This is a book that's long overdue: One that provides information that has never before been published, compiled or analyzed in a way that's designed to help fighters. This is a guide to the science of kicking and punching that can settle the debates about which techniques are the most effective and why. It will help a fighter to fight, an instructor to teach and martial artists to advance by working things out for themselves. There is no magic involved in the martial arts. The force and power that is displayed by an expert fighter is the consequence of rigorous training in the accurate application of physical laws. Understanding how to use these laws of physics to create massive impact forces will provide a personal insight into the practice of correct technique and form. This unique piece of work will act as a technical reference that provides the facts and figures that fighters seek, including records of the maximum force and speed achieved by some of the best present day warriors, helping to answer many of the most difficult questions in the martial arts.

In *Alienation Nation*, James LaFond, the author of over 10 books and 300 articles on urban survival, offers a guide to defining and surviving our dystopian now. As a committed Darwinist LaFond offers no societal solutions and advocates no political action, but rather offers a guide to living below the political and criminal horizon [which he insists are one in the same] and adopting a practical view of violence and society toward the end of developing sustainable countermeasures that will permit you to avoid and survive crime without falling into the clutches of the judicial system.

There have been several scientific books and lecture papers written on the subject of our holographic universe but none have gone far enough as to expand peoples thinking and explain the true nature of reality. Music is a natural consequence of the pure mathematics within nature. Music is a true universal language as Music is vibrational physics and mathematics that is a language understood by the human mind. The silent music of the universe or Aether Physics from the RG Veda is the only ONE science that explains the true perfection of creation and our connection to the holographic universe. Quantum Metrics are from the RG Veda: Quantum Physicist already knowing the answer as they have taken it the RG Veda then creates complicated elongated mathematical equations to derive at their Metric, which they name after themselves. I explain how to calculate all 90 metrics contained in RG Veda using a dividend and divisor and how to apply this system of harmony to devices you can manufacture such as electric motors. I would not dare name any of the yet "undiscovered" Metrics after myself, as no man should claim Gods work as his own. Although I have examples of the RG Vedas and other sources mentioning the Vedic Meter no one to my knowledge as given a full interpretation of them and what they relate to as I have done. I have deciphered and attempted to simplify one of the most ancient of mysteries and show how to apply it. My intention in releasing this information is to enlighten humanity as to assist in the rebuilding of the foundations of science for the advancement of all. We all must aspire to a brighter future and not allow this information to remain the industrial secret of occult societies. These societies have handicapped humanity for long enough and it is time to enter into the light from the darkness and advance our civilization. The zenith is the point in the sky or celestial sphere directly above an observer. God, sees all life in all dimensions and knows all of us, we should all strive for Krsna Consciousness and free ourselves from the illusion of our material world. When there is harmony between the mind, heart and resolution then nothing is impossible.

The Standard Model is renormalizable and mathematically self-consistent, however despite having huge and continued successes in providing experimental predictions it does leave some unexplained phenomena. In particular, although the Physics of Special Relativity is incorporated, general relativity is not, and The Standard Model will fail at energies or distances where the graviton is expected to emerge. Therefore in a modern field theory context, it is seen as an effective field theory. The Standard Model is a quantum field theory, meaning its fundamental objects are quantum fields which are defined at all points in space-time. These fields are: 1.) the fermion eld, which accounts for "matter particles"; 2.) the electroweak boson elds W_1 , W_2 , W_3 , and B ; 3.) the gluon eld, G ; and 4.) the Higgs eld, These are quantum rather than classical elds and that has the mathematical consequence that they are operator-valued. In particular, values of the elds generally do not commute. As operators, they act upon the quantum state (ket vector). This book explains the mathematics and logic that supports the latest models of cosmology and particle physics as they are understood in the Grand Unification Theory (G.U.T.) and discusses the efforts and hurdles that are involved in taking the next step to defining an acceptable Theory of Everything (T.O.E.)."
