Grounded in meaningful real-world contexts, Experience Psychology 's contemporary examples, personalized author notes, and applied exercises speak directly to students, allowing them to engage with psychology and to learn verbally, visually, and experientially—by reading, seeing, and doing. With the Experience Psychology learning system, students do not just “ take ” psychology but actively experience it. Experience a Personalized Approach How many students think they know everything about introductory psychology but struggle on the first exam? LearnSmart, McGraw-Hill 's adaptive learning system, pinpoints students ' metacognitive abilities and limitations, identifying what they know—and more importantly, what they don ' t know. Using Bloom ' s Taxonomy and a highly sophisticated “ smart ” algorithm, LearnSmart creates a personalized, customized study plan that ' s unique to each individual student ' s demonstrated needs. With virtually no administrative overhead, instructors using LearnSmart are reporting an increase in student performance by a letter-grade or more. Throughout Experience Psychology, students find a wealth of personal pedagogical “ asides ” directly from Laura King to guide their understanding and stimulate their interest as they read.
