This volume contains the Proceedings of MUSME 2014, held at Huatulco in Oaxaca, Mexico, October 2014. Topics include analysis and synthesis of mechanisms; dynamics of multibody systems; design algorithms for mechatronic systems; simulation procedures and results; prototypes and their performance; robots and micromachines; experimental validations; theory of

mechatronic simulation; mechatronic systems; and control of mechatronic systems. The MUSME symposium on Multibody Systems and Mechatronics was held under the auspices of IFToMM, the International Federation for Promotion of Mechanism and Machine Science, and FeIbIM, the Iberoamerican Federation of Mechanical Engineering. Since the first symposium in 2002, MUSME events have been characterised by the way they stimulate the integration between the various mechatronics and multibody

---

systems dynamics disciplines, present a forum for facilitating contacts among researchers and students mainly in South American countries, and serve as a joint conference for the IFToMM and FeIbIM communities.

### **Aircraft Engineering for Pilots** TAN Books

This book presents the select proceedings of the International Conference on Functional Material, Manufacturing and Performances (ICFMMP) 2019. The book covers broad aspects of several topics involved in the metrology and measurement of engineering surfaces and their implementation in automotive, bio-manufacturing, chemicals, electronics, energy, construction materials, and other engineering applications. The contents focus on cutting-edge instruments,

methods and standards in the field of metrology and mechanical properties of advanced materials. Given the scope of the topics, this book can be useful for students, researchers and professionals interested in the measurement of surfaces, and the applications thereof.

This book provides a thorough overview of cutting-edge research on electronics applications relevant to industry, the environment, and society at large. It covers a broad spectrum of application domains,

---

from automotive to space and from health to security, while devoting special attention to the use of embedded devices and sensors for imaging, communication and control. The book is based on the 2020 ApplePies Conference, held online in November 2020, which brought together researchers and stakeholders to consider the most significant current trends in the field of applied electronics and to debate visions for the future. Areas addressed by the conference included information communication technology; biotechnology and biomedical imaging; space; secure, clean and efficient energy; the environment; and smart, green and integrated transport. As electronics technology continues to develop apace, constantly meeting previously unthinkable targets, further attention needs to be directed toward the electronics applications and the development of systems that facilitate human activities. This book, written by industrial and academic professionals, represents a valuable contribution in this endeavor.

## Molecular Ecology and Conservation Genetics of Neotropical Mammals Springer

The subjects of stress and animal welfare are currently attracting immense interest. This book brings together a range of perspectives from biomedical research (including human health and animal models of human stress) on stress and welfare, and assesses new approaches to conceptualising and alleviating stress.

## Greek Medical Papyri Springer Nature

This book includes over 30 real-life, up-to-date, award-winning case studies in scientific fields such as

---

biotechnology, biomedicine, high-tech engineering and information technology. The case studies are arranged in modules that track the typical life cycle of creating and growing a new venture, which presents a comprehensive picture of entrepreneurial activities. The text is written in a language and style that managers will appreciate.

This work serves as a reference concerning the automotive chassis, i.e. everything that is inside a vehicle except the engine and the

body. It is the result of a decade of work mostly done by the FIAT group, who supplied material, together with other automotive companies, and sponsored the work.

The first volume deals with the design of automotive components and the second volume treats the various aspects of the design of a vehicle as a system.

The Australian Official Journal of Trademarks Springer Nature  
A book dedicated to a true milestone in the history of the Innocenti scooter: “ Scooterlinea 1962 ” , a thoroughly revised Lambretta that was a protagonist on the worldwide scooter scene of the Sixties. Technically known as the “ Series III ” , the new Lambretta was launched late in 1961, initially with the two 125 and 150 cc displacements, later joined by the 175 TV in the spring of 1962. The third title in the series dedicated to the most important Lambrettas (which include the Lambretta Lui and the Lambretta TV/LI Series I),

celebrates a model characterised by sleek and aggressive bodywork and equipped with a front disc brake and an extremely high level of fittings and finish. Written by Vittorio Tessera, the leading Lambretta historian, the book reviews the complete industrial, technical and social history of the Scooterlinea, drawing on hundreds of previously unpublished contemporary photos in black and white and colour.

Horace's Satires owe debts of influence to a wide range of genres and authors, including, as this study demonstrates, the moral tradition of Epicureanism. Focusing on the philosopher Philodemus of Gadara, it argues that the central concerns of his work lie at the heart of the poet's criticisms of Roman society and its shortcomings.

This successful book, now in its third edition, continues to provide a comprehensive introduction to the role of epidemiology in veterinary medicine. Since the publication of the second edition there has been considerable expansion in the application of veterinary epidemiology: more quantitative methods are available, challenges such as the epidemic of foot-and-mouth disease in Europe in 2001 have required epidemiological investigation, and epidemiological analyses have taken on further importance with the emergence of evidence-based veterinary medicine. In this edition: Completely revised

---

and expanded chapters; Increased attention given to the principles and concepts of epidemiology, surveillance, and diagnostic-test validation and performance; Many examples are drawn from both large and small animal medicine, and from the developing as well as the developed world This paperback edition includes a new section on risk analysis. Veterinary Epidemiology is an invaluable reference source for veterinary general practitioners, government veterinarians, agricultural economists and members of other disciplines interested in animal disease. It will also be essential

reading for undergraduate and intermediate-level postgraduate students of epidemiology.
