PIC32 DEVELOPMENT -- SD CARD LIBRARY By Chang Liu (cl2428) and Pei

Xu (px29) Abstract: This project aims to design and develop a secure digital (SD) card library based on PIC32 microcontroller. The main function of this system is to read and store files from the SD card. In addition, this system gives PIC32 developers access to large memory to store image and files. It also serves for later ...

Secure digital (SD) card: SD cards are the most widely used memory cards today. They are based on MMC and in terms of functionality they

are the same (except that the SD has an optional encryption feature). The SD are physically thicker than MMCs and would not fit into MMC slots. The MMC, on the other hand, can be easily inserted into SD card slots. SD cards are available in three different ...
