How to Remove a PICC Line: 12 Steps (with Pictures) - wikiHow

A PICC line gives your doctor access to the large central veins near the heart. It's generally used to give medications or liquid nutrition. A PICC line can help avoid the pain of frequent needle sticks and reduce the risk of irritation to the smaller veins in your arms.. A PICC line requires careful care and monitoring for complications, including infection and blood clots.

Legal Issues: PICC Line and Midline Program

PICC (Peripherally Inserted Central Catheter) Removal-Action/Rationale 05/10/2013Im Page 2 working outward, allow to air dry for approx. 30 seconds. 13. Place sterile gauze just above insertion site, (to have ready to apply pressure when catheter is removed). 13.

Since a PICC is a central line you want to assess and comment on more than just the how the site looks. If you are doing a short note you can say something like right arm dual lumen PICC with D5W infusing at 25 ml per hour. There are no s/sx of any PICC related complications observed. The dressing is CDI.

Indwelling urinary catheter - insertion and ongoing care

unless indicated otherwise. Antimicrobial impregnated catheter (short term non cuffed) should be considered if duration of 1 to 3 weeks and if the risk of catheter-related blood stream infection (CrBSI) is high. Royal Marsden - CVAD policy: a real world example This local policy is an example used in the
