Presenting 60 years of newspaper advertising for motion pictures great and small, this book features ads created by Hollywood and adapted by local and regional exhibitors that motivated patrons to leave their homes, part with precious income, and spend time in the dark. Because of the high stakes involved, theater operators used wildly creative means to make that happen. They made movie advertising equal parts art and psychology, appealing to every human instinct in an effort to push product and keep

their theatres in business. From the pen-and-ink masterpieces of the 1920s and 30s to location-specific folk art to ad space jam-packed with enticements for every member of the family, the book dissects the psyche of the American movie-going public and the advertisers seeking to push just the right buttons.

If you are looking for the definitive resource to help you measure your students' achievement, your search is over. PE Metrics: Assessing Student Performance Using the National Standards & Grade-Level Outcomes for K-12 Physical Education, Third

Edition, aligns with SHAPE America's National Standards and Grade-Level Outcomes for K-12 Physical Education, was created by SHAPE America and its writing team, and was reviewed by researchers and teachers with expertise in assessment. The result is a text that you can use with confidence as you help develop physical literacy in your students. Written for physical educators, administrators, and curriculum writers (and for physical education majors and minors), this latest edition offers the following:

- 130 ready-to-use assessments for kindergarten through grade 12 (65 elementary, 43 middle school, and 22 high school)
- Worksheets, checklists, and rubrics that support the assessments
- Guidance on creating your own assessments for any lesson or unit

These assessments are aligned with the three SHAPE America lesson planning books for elementary, middle, and secondary school and dovetail with SHAPE America's The Essentials of Teaching Physical Education. The assessments can be used

as they are, or you can modify them or use them as samples in creating assessments that are best suited to your needs. PE Metrics, now in a four-color design, is organized into four main parts: Part I introduces the purpose and uses of assessment, how to develop an assessment plan, and the various types of assessments and tools you can use. Part II contains sample assessments for students in grades K-5, focusing on fundamental motor skills; as such, the elementary-level assessments center heavily on Standard 1. In part III, the emphasis shifts to middle school assessments, with a concentration on Standard 2 and on the categories of dance and rhythms, invasion games, net/wall games, fielding/striking games, outdoor pursuits, aquatics, and individual-performance activities. Part IV offers sample assessments for high school students, with a priority on providing evidence of the knowledge and skills students will need to remain active and fit after they leave high school. This resource provides a

comprehensive, performance-based assessment system that enables you to incorporate assessment into every facet of your teaching, create assessments that are unique to your program, and measure your students' performance against the grade-level outcomes. The assessments are process focused and are designed to measure multiple constructs as well as provide meaningful feedback to students—ultimately helping them to develop holistically across all three learning domains (psychomotor, cognitive, and affective). PE Metrics will help you instill in students the knowledge, skills, and confidence they need to enjoy a lifetime of healthful physical activity.

If you agree that physical education should be fun, instructive, and a place where students acquire physical and life skills, then you'll love PE2theMax: Maximize Skills, Participation, Teamwork, and Fun.
J.D. Hughes, author of the popular No Standing Around in My Gym, has created 30 never-been-done-before games, tried and tested in the gymnasiums and on the fields and courts of Villa Rica, Georgia, where he teaches elementary school. These games are designed for large groups--anywhere from 30 to 75 students--but can be scaled back easily for smaller class sizes. Each game provides students of all athletic abilities the opportunity to have fun, be active, and acquire movement and sport skills. Here's what you will discover about the games in PE2theMax: - No down time. The games are quick and easy to get going, and they'll keep students active for the entire class period. -

Essentially no prep time. These games are ready to use, simple to understand, and supplemented with clear illustrations, diagrams, and a game finder to help you readily find the game you want. - Plenty of skill-building time. Students acquire not only movement and sport skills but life skills as well. The games emphasize cooperation, communication, personal responsibility, respect for others, positive competition, critical thinking, and problem solving. - Fun participation. If PE is fun, kids will want to participate. If they participate, they will experience the joy of being active. If they experience that joy, they just might move toward remaining active throughout their lives. The games in PE2theMax are student centered, not teacher centered. As such, students are motivated to challenge themselves to succeed. The games are inclusive and developmentally appropriate. They define what a quality PE program and the New PE philosophy are all about: promoting participation and lifelong fitness as well as self-esteem and initiative. Most

important, from the kids' perspective, "these games rock."
