" One of the most important books I ' ve ever read—an indispensable guide to thinking clearly about the world. " – Bill Gates

" Hans Rosling tells the story of ' the secret silent miracle of human progress ' as only he

can. But Factfulness does much more than that. It also explains why progress is so often secret and silent and teaches readers how to see it clearly.” —Melinda Gates

"Factfulness by Hans Rosling, an outstanding international public health expert, is a hopeful book about the potential for human progress when we work off facts rather than our inherent biases." - Former U.S. President

Barack Obama

Factfulness: The stress-reducing habit of only carrying opinions for which you have strong supporting facts. When asked simple questions about global trends—what percentage of the world’s population live in poverty; why the world’s population is increasing; how many girls finish school—we systematically get the answers wrong. So wrong that a

chimpanzee choosing answers at random will consistently outguess teachers, journalists, Nobel laureates, and investment bankers. In Factfulness, Professor of International Health and global TED phenomenon Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a radical new explanation of why this happens. They reveal the ten instincts that distort our

perspective—from our tendency to divide the world into two camps (usually some version of us and them) to the way we consume media (where fear rules) to how we perceive progress (believing that most things are getting worse). Our problem is that we don't know what we don't know, and even our guesses are informed by unconscious and predictable biases. It turns out that the world,

for all its imperfections, is in a much better state than we might think. That doesn't mean there aren't real concerns. But when we worry about everything all the time instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us most. Inspiring and revelatory, filled with lively anecdotes and moving stories, *Factfulness* is an urgent

essential book that will change the way you see the world and empower you to respond to the crises and opportunities of the future. --- “ This book is my last battle in my life-long mission to fight devastating ignorance...Previously I armed myself with huge data sets, eye-opening software, an energetic learning style and a Swedish bayonet for sword-swallowing. It wasn't enough. But I

hope this book will be.”
Hans Rosling, February
2017.

Civil servants are hard at work, researching, compiling, cross-checking. Facts and trivia, questions and puzzles. This is the Ministry of Quizzes. This small but essential government department serves the nation ' s needs on all matters relating to quizzes, puzzles and

general knowledge trivia. Now, for the first time, their work can be revealed. The Ministry of Quizzes features an ingenious and irresistible mixture of over 200 quizzes and puzzles to be played solo or with family and friends. Not everyone is convinced this government department actually exists. In this book the author looks at the past, present and the future of history teaching in primary schools in an attempt to provide a practical framework for teachers. Section one reviews relevant literature with an aim to clarify the

dilemmas and advance present thinking and practice in history teaching in primary schools. Section two offers case studies, curriculum materials and designs, teaching ideas and methods, teacher-development and curriculum development materials, at the same time as tying it in to the existing knowledge-base. Section three considers the 'perennial dilemmas' for school history in the 21st century, including: how can history survive in an increasingly over-crowded and competitive school curriculum? How can

history be harnessed to improvements in literacy and numeracy? What should the primary history curriculum contain? How can IT secure easier access to historical information and evidence?
