One-Cylinder Engines: These used Harley engines were mainly manufactured for single-cylinder motorcycles. They were produced regularly until 1934 before big twin engines took over. If you have a vintage Harley-Davidson before World War II, it may be using F-Head and Flathead engine models.

Amazon.com: harley davidson posters

There are two main Harley groups: Big Twins and Everything Else. Big Twin Harleys have separate transmission assemblies (the gearbox and the engine use different lubricants, allowing for extensive work to be done to the gearbox without splitting the engine cases) and left side final drive.
